- Oligopoly, business game for Spectrum 4−52140
- Olympiad game, in BASIC, for Commodore 64, VIC-20 and Atari 4−36741
- Oric 1 game, Lander, in machine code 4−41288
- Oric 48K microcomputer, arcade game, 'Warlock's Mountain, in BASIC 4−27990
- Oric 48K microcomputer, Space Invaders, BASIC and machine code listing 4−36773
- Oric microcomputer software, review of new games 4−27982
- Oric software review 4−27996
- Othello, game of strategies *(Spanish)* 4−28005
- Pests game, in BASIC, for Commodore 64, VIC-20, IBM PC and PCjr 4−36740
- PET, Wrap Trap computer game for two machines, in BASIC 4−27998
- PET 3D Os & Xs, noughts and crosses game, in BASIC 4−47565
- physics demonstrations and games using microcomputer 4−47553
- Pilot Software City, computer games shop 4−28066
- poker for BBC Model B micro, workings 4−36734
- poker game for BBC micro 4−36733
- PREXGO and PREXLONG: from computer game to serious computerized simulation 4−36653
- programming and designing games programs 4−34779
- puzzles and brainteaser, computer programs 4−47554
- reaction testing program, in BASIC 4−41296
- Reinforce, game program 4−28003
- Research Machines 380Z programs in BASIC 4−41337
- Research Machines RML 380Z, tank game, Super Tangle, in BASIC 5.0 4−31934
- reverse, puzzle in BASIC 4−52161
- Reversi, computer game in BASIC 4−41322
- RML 380Z game, Millipede, in BASIC 4−41327
- robot computer chess game 4−27960
- robotic visions/ranging systems for playing ping pong 4−51799
- Roman Empire game, BASIC program 4−36780
- Rubik's cube in APL 4−50499
- Sargon III chess program *(German)* 4−31918
- simulation game, Mugsy 4−47495
- Sinclair computers, software directory 4−52150
- Sinclair Spectrum, arcade game 'Dracman', in BASIC 4−27983
- Sinclair Spectrum, games packages, review 4−31930
- Sinclair Spectrum, shooting game, Space Quest, in BASIC and machine code 4−41292
- Sinclair Spectrum, Supalanda game, in BASIC 4−41326
- Sinclair Spectrum, word game, Eights, in BASIC 4−31933
- Sinclair Spectrum game, Fighter Pilot 4−27980
- Sinclair ZX81 arcade game, 'Froggie', in machine code 4−27985
- Sinclair ZX-81 game, Laser Duel, in machine code 4−41289
- Skrambler, hill hopping game for the spectrum 4−36747
- Snip Snap game 4−47519
- Snooker game, for BBC, Spectrum and Commodore 64 4−52165
- software reviews and listings 4−47491
- software security in entertainment electronics 4−39687
- spaceship guidance and meteor avoidance game program, in BASIC 4−41304
- Spectrum, games software 4−36745
- Spectrum games marketing service, review of two games 4−28065
- Spectrum Martian attack game program 4−47572
- sports, simulation software for the Sinclair Spectrum 4−52147
- Star Wars game, BASIC instructions for Spectrum *(Spanish)* 4−47577
- Stellar Fighter game for 48K Spectrum in BASIC 4−47529
- strategic game for ZX-81, Luftwaffe in BASIC 4−47526
- subhunter game, sprite creation routine, in BASIC 4−50693
- subhunter game for Commodore 64, explosions and end of game 4−52158
- Subhunter game program, scoring subroutine, in BASIC 4−50692
- subhunter game project, sprite movement routines, in BASIC 4−47545
- Superstar chess microcomputer from SciSys 4−44724
- Tank Attack, game program for Dragon, BASIC program listing 4−36770
- text adventure game, Enchanter, from Infocom 4−31896
- text adventure game, Infidel 4−52091
- Tierce, for Jupiter Ace *(French)* 4−31887
- Towers of Hanoi, puzzle game for Spectrum 4−41321
- training appls. of videogame technology 4−41205
- VIC 20 games, The Hatchery, in BASIC 4−41328
- Vic 20 maze game, Labyrinth, in BASIC 4−41293
- Vic game, Beekeeper, in BASIC and machine code 4−52127
- Vic game, Caterpillar, in BASIC 4−52126
- Vic-20, car-driving game, Icy Road, in BASIC 4−52120
- Vic-20, card game, Vicjack, in BASIC 4−52121
- VIC-20 Deathwall game, in BASIC 4−47564
- Vic-20 game, Resistance Escape, in BASIC 4−52122

games of skill continued
- video game industry, development trends 4—41418
- video games, European market *(German)* 4—36767
- Village Defence game for Dragon 32 in BASIC 4—41312
- VIV 20 Dogfight 4—36750
- war and fantasy computer games, product review 4—36777
- Word Game for Atari, listing in BASIC 4—52104
- word games, random letter generation problems 4—41217
- ZX81 game, Mastermind, in machine code 4—36775

gamma-ray applications
- *see also radiation therapy*
- Shimadzu automated multigamma counter RAW-1600 for radioimmunoassay in clinical chem. laboratories *(Japanese)* 4—25268

gamma-ray astronomy
- altazimuth mountings of a gamma-ray telescopes, choice of astatic system for controlling DC motor speed 4—43816

gamma-ray detection and measurement
- *see also gamma-ray spectrometers; radioactivity measurement*
- nuclear safeguards, software, data structs. and data eval. for verification system 4—50718
- SAMPO, gamma-spectrum anal. program for microcomputers 4—27355
- sequential probability ratio controllers for nuclear safeguards radiation monitors 4—51830
- Shimadzu automated multigamma counter RAW-1600 for radioimmunoassay in clinical chem. laboratories *(Japanese)* 4—25268
- NaI(Tl) 3″Ø×3″ detector, response functions, data and method assessment 4—36054

gamma-ray lasers
- No entries

gamma-ray spectrometers
- computerised acquisition system 4—26535
- dead-time correction method, short-lived radioisotopes, gamma-ray spectrometry 4—46694

garbage collection (computers) *see storage management and garbage collection*

gas analysis *see chemical analysis*

gas breakdown *see electric breakdown of gases*

gas-discharge displays
- DC-plasma panel displays full page in 8-by-5-in. area 4—26286
- flat panel displays 4—26287

gas discharge lamps *see discharge lamps*

gas-discharge tubes
- *see also gas-discharge displays; ion sources; mercury arc rectifiers; thyratrons*
- testing, CAMAC system *(Hungarian)* 4—38675

gas discharges *see discharges (electric)*

gas dynamic lasers *see gasdynamic lasers*

gas lasers
- *see also chemical lasers; gasdynamic lasers; ion lasers*

query language for virtual relational databases, LOFE 4–39707
query languages, learning evaluation 4–35068
query languages for document retrieval 4–35067
quick text formatter, editor for FORTH blocks 4–34896

high level languages continued
- RCC, for distributed real-time multimicroprocessor appls. 4—30679
- real-time control programs, hierarchy structured, extension of higher level languages *(German)* 4—35060
- real-time features of a high-level language 4—30673
- real-time languages, block structure alternative *(Polish)* 4—26626
- real-time program systems, simplification of maintenance, design and development *(German)* 4—45316
- real-time requirements for programming environments and languages 4—30678
- real-time simulation language, for processes with Boolean inputs and outputs 4—27501
- reduced high-level-language instruction set 4—50727
- relational database management system, hierarchical optimisation strategy for query evaluation 4—30870
- relational databases 4—45892
- relational representation of an abstract type system 4—45907
- report writer language for data base management, medical appl. 4—39754
- review of common programming languages 4—30642
- Rexcom, fourth-generation language and integrated DBMS package, use at NASA for training 4—36552
- ring-configuration multiprocessor computers, matrix associative coordinate language *(Russian)* 4—26769
- robot control languages 4—26609
- robot programming 4—26464
- robotics, early development stages review 4—29232
- run-time declaration elaboration 4—30667
- RVL/A, robot vision language 4—26653
- satellite processors, parallel programming support in distributed UNIX environment 4—39131
- SCHOLAR VLSI design language incorporating self-timed concurrent processes 4—27705
- SCOPE, graphics language for Spectrum 4—35017
- SDL application to stored program control system for Austrian digital telephone *(German)* 4—43667
- SDM: from checklist to language *(Dutch)* 4—26422
- semantics of constructs, definition in terms of lambda calculus 4—25449
- SETL in software prototyping, use in Ada/Ed translator project 4—50525
- signal processing software tools 4—47116
- SIMSEA animation language, simulation visualisation 4—45694
- SIMULA overview 4—45642
- simulation in strongly typed languages, conference, San Diego, CA, USA (Feb. 1984) 4—46876
- simulation language for computer systems performance evaluation *(Japanese)* 4—50796
- SLAN-4—a software specification and design language 4—35042
- SLED/SDL symbolic VLSI design system 4—31580
- Smalltalk, Lisp coroutines implementation 4—50809
- Snobol4 patterns, property proving using assertion formats 4—50808
- SNOBOL4 with profiling facility and its transferability *(Japanese)* 4—50599
- software development environment and language, towards an integration 4—26439
- Software Subsystems for very large systems 4—30691
- SORCA, language for process and time-plane controlled procedure regulation *(German)* 4—30644
- specialised interactive languages for statisticians 4—26651
- specification language for discrete event models in model development systems 4—35063
- specification language for one-pass semantic analysis 4—50855
- specification languages characterisation 4—45670
- SPS hardware independent language for programmable controllers *(German)* 4—28888
- STOIC-based application language for muscle mechanics research 4—35005
- structured command elucidation in dialogue, program system similar to PL/1 *(German)* 4—30670
- structured methodologies, future directions 4—26453
- suitability of current software *(German)* 4—50495
- superheater control system closed loop on-line real-time identification *(Chinese)* 4—24283
- syntax analyser, Telidon pre-compiled FORTH appl. 4—26558
- systems of stratified knowledge language, semantic representation of texts *(Russian)* 4—40501
- teaching programming with Spider World 4—32107
- test program compiler—a high level test program specification language 4—31586
- Texas Instruments transportable design utility using hardware description languages 4—25626
- third generation languages, LISP, ALGOL, Ada, SNOBOL, PEARL, FORTRAN, PASCAL, APL and PL/1 *(German)* 4—34979
- TL-10: A programming language for assembly robots 4—26652
- transformation approach to implementing aggregate operations 4—39734
- transportable program language compiler system 4—45740
- Turing, the development of the language 4—34981
- UMS language for manipulation systems programming, teaching and verification of control algorithms 4—50787
- Unix's Shell language *(Chinese)* 4—45614
- UNIX operating system *(Italian)* 4—45843
- user language controlled evaluation of a memory *(German)* 4—26629
- Utah text retrieval project 4—31280
- VAL-II, flexible robot control system and programming language 4—47146
- Victor 9000 sound generation in FORTH 4—30380
- VLSI floorplanning 4—31578
- Word Processing Language 4—39733
- XYZ/E, unified logic basis for programming languages 4—45682
- ZX81-FORTH ROM 4—34061

high-pass filters
- computer modelling of high-pass, band-pass and band-stop filters 4—40948
- design of low, high and band pass filters, comp. program in BASIC *(Spanish)* 4—47021
- electronic controls and switches, operation and appl. *(German)* 4—33224
- FIR digital filters, efficient recursive realisations and appl. 4—34044

high power amplifiers *see power amplifiers*

high-pressure techniques
- microprocessor-controlled remote data acquisition unit for hyperbaric environment 4—51586

high-temperature techniques
- *see also pyrometers*
- materials thermophysical props. meas., high-speed printer interface to Elektronika D3-28 computer 4—40615

high vacuum gauges *see vacuum gauges*

high-voltage engineering
- *see also high-voltage techniques*
- decentralized control of multiterminal HVDC system embedded in AC networks 4—43152
- distribution networks optimisation, computer-aided design and dimensioning *(Czech)* 4—31462
- HVDC bipoles 1 and 2, Nelson River, paralleling and deparalleling tests 4—33307
- HVDC links, AC faults, combined control and protection system 4—38311
- microprocessor-controlled HVDC simulator 4—51664
- short-circuit forces, influence of ground grids 4—27590
- spacecraft battery cell scanner development 4—24865

high-voltage techniques
- EHT regulator output stage 4—24811
- laboratory, EMI investigation 4—49445
- static or synchronous compensators in HVDC systems 4—24801

hip joint replacements *see prosthetics*

history
- ABET accreditation of computer science and engineering programs 4—32096
- analytical machine for programming languages, algorithm theory and failure criteria *(German)* 4—41450
- art, historical records, computerized inventories, missing data 4—47454
- artificial intelligence and thinking machines, history 4—41648
- AT&T, history *(French)* 4—28168
- CAD/CAM, history and recent Computervision moves 4—36247
- CAI: impact on history, geography and economics teaching, secondary schools 4—47337
- calculating machines, history 4—36835
- cardiac arrhythmias, computer detect., historical review 4—40770
- computer memory evolution, price reduction and trends 4—38986
- computer operating system Unix, history, philosophy, structure and environment 4—39875
- computers, commercial applications, 1959-1984 4—23837
- computing developments, 1959-1984 4—23838
- computing prior to FORTRAN 4—41434
- computing technology, development 4—47684
- control technology historical outline *(Swedish)* 4—28019
- CP/M operating system, history 4—30793
- CSIRAC, stored program computer history 4—44671
- DEC, history, office systems products and market strategy 4—41612
- eighteenth century literature database, ESTC 4—46574
- electrical and electronic phenomena and devices, book 4—28072
- electron beam welding with NC machines, features *(German)* 4—49124
- electronic music, synthesizer development and Musical Instrument Digital Interface 4—47437
- FORTRAN history, computers and institutions 4—41433
- German Post Office services, data processing *(German)* 4—35738
- HISTIPS (history—teaching information processing system) 4—46159
- information processing conf. Calgary, Alberta, Canada (May 1984) 4—47685
- information science 4—40339
- information sociotechnology, 1973-83 4—23892
- information technology, information scientist's view 4—40340
- information technology industry, standards development 4—46431
- keyboard, history and future vision 4—41440
- legal databases and historical lexicography 4—51443
- LISP, development history and description *(French)* 4—30653
- logic programming—past, present and future 4—30436
- LP, discovery, Kantorovich, Koopmans, Dantzig 4—48021
- mathematical programming systems, development 4—51464
- medieval document anal., Knights Templar trials 4—52016
- microcomputers, future trends read in mainframe past 4—32123
- Modula-2, history and goals 4—50729
- museums and museology in the age of electronic communication 4—40570
- Pegasus, comparison with ICL Personal Computer 4—34257
- personal computer industry, history since 1978 4—32167
- personal computers, review of first decade 4—28175
- role of the information retrieval languages in communication of information in historical sciences *(Slovak)* 4—36720
- spectral analysis, confidence intervals for steady-state simulations 4—32989
- Stockholm Historical Data Base for research in humanities and social sciences 4—52012
- University of Maryland computer vision research, 20-year retrospective study 4—49880
- word processing, scientific, and printer development, history 4—41431

HIXE *see ion microprobe analysis; X-ray chemical analysis*

hobby computing *see personal computing*

hodoscopes *see cosmic ray apparatus*

hoisting equipment *see hoists*

hoisting machinery *see hoists*

hoists
- *see also materials handling*
- induction motor drive operational control under dynamic braking conditions *(Russian)* 4—38302
- robots, lifting task appls. 4—24743
- speed reference unit with acceleration derivative limitation for mine hoist control systems *(Polish)* 4—24725

holograms *see holography*

holographic instruments
- *see also holography*
- computer generated holographic laser scanner for 2D graphics 4—30270
- polygonal scanner using flat-field linearised scans with reflection dichromated gelatin holographic grating 4—46660
- thermic fluid velocity sensor, interferometrical temperature field measurement *(German)* 4—28839

holographic interferometry
- aspheric surface testing with interference type, computer-generated holograms *(Chinese)* 4—40607
- automated system, microprocessor control/data acquisition, real-time signal processing, NDT appl. 4—29431

holographic interferometry continued
automatic scanning with improved sensitivity of fringe patterns using microdensitometer 4−27373
spatial carrier-fringe-pattern anal. 4−42205
thermic fluid velocity sensor, interferometrical temperature field measurement *(German)* 4−28839
holographic storage
binary images in holographic memory units using laser diodes *(Russian)* 4−50001
optical computing, ALU systems implementation prospective ideas 4−50002
PMMA thick films for volume-type multiple hologram memory 4−34205
process for making a dichromated gelatin holographic disk 4−44530
quasi-one-dimensional volume-type hologram memory 4−39073
holography
see also acoustic holography; computer-generated holography; holographic instruments; holographic interferometry; holographic storage
deployable optical systems, conf., Los Angeles, CA, USA (Jan. 1983) 4−33478
Holodata meas. system, industrial appl. *(French)* 4−49182
image recognition, optical-electronic system with operational input and preliminary processing of images for recognition *(Russian)* 4−48148
motor car manufacture, quality control, appl. of stress and strain anal. *(German)* 4−38433
optics in entertainment, conf., Los Angeles, CA, USA (Jan. 1984) 4−49864
picture segmentation, use of speckle statistics in real hologram reconstructions *(German)* 4−28532
radiofrequency wavefront data, wavefront processing 4−49911
two-shutter controller for investigation of the kinetics of the recording of dynamic holograms 4−38666
homogenising *see heat treatment*
horn antennas *see directive antennas; waveguide antennas*
horology *see time measurement*
hospital administration *see medical administrative data processing*
hospital engineering *see biomedical engineering*
hospital information systems *see medical administrative data processing*
hot cathode tubes *see thermionic tubes*
hot pressing
plywood, improved hot pressing using pressure controls 4−38490
hot rolling
automatic gain control systems in hot strip mills, stability and accuracy 4−49020
axial temperature distribution prediction using mathematical model 4−24906
ingots, liquid centre and hot centre rolling using on-line computer control 4−33358
length meas. of hot-rolled section, automation *(Russian)* 4−29432
steel plates, high-toughness, commercial production by reheating of slabs 4−49008
Al hot rolling control, IR thermometry 4−33162
hot working
see also hot rolling
No entries
household appliances *see domestic appliances*
human engineering *see ergonomics*
human factors

insurance
aggregate dividend decision making 4—48412
bank crime insurance, electronic age 4—27038
computer insurance, benefits 4—37203
computer insurance, cover available 4—41443
computer system faults, insurance policies 4—24076
computer-related risk insurance and fidelity bonds 4—32340
DEC computers, disaster recovery, insurance 4—41747
EDP insurance 4—24088
Electronic and Computer Crime insurance policy, computer-related fraud 4—51237
home computer insurance 4—47675
office design of Aid Insurance Services Minneapolis branch 4—31086
optimal indemnity schedules 4—24437
risk analysis *(Italian)* 4—28253
Social Security disability insurance beneficiaries, proportional hazard semi-Markov model 4—37841
VDU nonradiation hazards, recommendations and legislative proposals 4—32179

insurance data processing
Abbey Life national computer-based network, Aladin 4—31092
Aetna Life and Casualty office automation, People/Technology Program, employees' role 4—27059
attitudes towards computing, expectations 4—41545
Bankers Life, evolving applications systems 4—51215
Barmer Ersatzkasse insurance company, computer network *(German)* 4—31094
Baseline microcomputer-mainframe link package at Alexander Howden Group 4—34463
billing system, automated, mag. tape based 4—35521
brokers, application software assessment and recommendations 4—40141
brokers, office automation appl. 4—27043
computer network control from DP viewpoint, Guardian Royal Exchange 4—37225
computer-aided claims processing in insurance companies *(German)* 4—27054
corporate database environment, charge to 4—51213
customer services *(German)* 4—51228
customer-oriented internal processing of documents in insurance company *(German)* 4—27053
decision support system, Wausau Insurance 4—46180
EDP auditors, role, audit functions 4—31047
Epson QX-10 for Berlin Insurance 4—51230
IBM information network provides insurance communications service 4—27044
image storage system for insurance appls. 4—46177
information distribution 4—31048
loss adjustment, computer assisted *(German)* 4—27052
manpower planning merits 4—51255
Maritime Life gets accounting face-lift 4—35488
market research, mapping system appl. 4—35725
marketing, investment in automation, advantages 4—31190
marketing activities in insurance enterprises *(German)* 4—31057
microcomputer network development at Eastern Benefit Systems 4—30173
microcomputers introduction, training programme 4—27015
Nationwide COM system 4—40169
office automation, computer/micrographics soln. 4—35519
office automation requirements for insurance industry 4—46165
old system migration at USF&G 4—51214
organisational structure for information services 4—51216
patient accounting systems, evaluation for private medical practice 4—27097
portable computers appl. 4—35511
provident funds, analysis of computer hardware 4—46223
provident funds, computer systems and applications 4—46160
record file integrity, management efficiency improves with microfiche processing system 4—31093
sales support in insurance company *(German)* 4—51225
security of data, computer crime 4—46164
software and services for Policy Management Systems 4—31080
telemarketing applications in insurance industry 4—27033
telemarketing applications in property/casualty insurance 4—27034
telemarketing system for life insurance agents 4—27035
Travelers Insurance Company, microcomputer appls. 4—40166
UK insurance industry, reliance on IBM, benefits and drawbacks 4—31090

integer programming
all-integer programming, advanced dual algorithm with constraint relaxation 4—41931
automatic identification of embedded network rows in large-scale optimization models 4—28396
bivalent, for optimal gymnastics team selection 4—48528
blood allocation to hospitals from central blood bank 4—32974

integer programming continued
bounded dual (all-integer) integer programming algorithm with objective cut 4—41934
clustering problems, anal. of integer programming formulations 4—37394
coefficients in integer linear inequalities, reduction method 4—41930
deep disjunctive cutting planes for set partitioning, computationally oriented research 4—37375
distribution substation and primary feeders, computer-aided planning 4—46932
dominance relations and algorithms 4—41924
dual approach to integer programming 4—28388
dynamic production planning and scheduling algorithm for two products processed on one line 4—48465
economic planning with institutional price constraints for a decentralized economy 4—28668
frequency-manipulated signals, synthesis, minimax constraints, autocorrel. function 4—42204
general ranking problem, mathematical models formulation *(German)* 4—32806
hierarchical health facility location-allocation problem 4—24491
IC layout and compaction, graph-optimisation techniques 4—27598
integrated model for master scheduling, lot sizing and capacity requirements planning 4—32916
linear programming, group relaxation 4—48017
linearization techniques, nonlinear integer programming 4—41923
low-density subset problems, public-key cryptography appls. 4—24242
$M/E_k/1$ queue serving several classes of customers, optimal control of entry 4—41825
machine tool gear transmission system multi-objective combination optimisation *(Chinese)* 4—42410
microprocessor system for solution of integer linear programming problems *(Russian)* 4—24232
microprograms register allocation, integer LP 4—50970
minimum convex cost dynamic network flows 4—37681
mixed integer programming. Benders type heuristics 4—32521
mixed model assembly line balancing with integer programming, task grouping approach 4—37747
multiproject network scheduling problem, (0-1) linear programming method anal. 4—48371
neighbourhood heuristic method of discrete programming 4—24226
network design and transportation planning, models and algorithms 4—32935
network location problems with distance constraints 4—32824
oxygen plant, optimal operations planning 4—42470
parameterisation algorithms for the integer linear programs in binary variables 4—41908
positive zero-one programming, lifting and complementing procedures 4—37448
primary health care system model for developing countries 4—48501
public health resource allocation, goal programming appl. 4—32977
public works allocation to private contractors 4—42538
register allocation approach in microprogram generation 4—34026
reliability optimisation by adaptive randomly directed search 4—28431
resource cost minimising in project networks with fixed completion time 4—37764
scheduling problems, cutting plane and branch and bound methods appl. 4—28644
signalised road junction, control system design 4—32942
Smith normal form of an integer matrix, comparing algorithms 4—41912
special ordered sets implementation in mathematical programming software 4—41906
stability, parametric, and postoptimality analysis of discrete optimization problems 4—37381
surrogate constraints algorithm for nonlinear and integer programming problems *(Japanese)* 4—24239
surrogate dual multiplier search procedures in integer programming 4—37685
travelling salesman problem formulation 4—28638

integral equations
see also integro-differential equations
3D fracture mechanics, boundary integral equation-boundary element method appls. *(Chinese)* 4—47240
Abel integral eqns. of second kind, product integration methods 4—43911
band-limited signal extrapolation in the presence of noise 4—48325
bounds for certain integrals 4—25391
computational algorithm for a distributed optimal control problem of parabolic type with terminal inequality constraints 4—37950
Diophantine equations 4—24160
Diophantine equations 4—24161
diophantine equations in partitions 4—24159
electrically long curvilinear conductors, current distribution algorithm 4—47026
elliptic integral computation; TI-59 program 4—31307
elliptic systems, function space approach to state and model error estimation 4—38077
Gauss-Jacobi quadrature for singular integral eqns., convergence 4—38757
generators for rational points 4—24162
ill-conditioned least-squares problems with triangular Toeplitz matrix, regularisation 4—25340
k-valued logic functions, basis synthesis in integral representation 4—38824
linear hyperbolic equations, first order, friction parameter identification 4—37300
liver kinetics, substrate conc. minimisation problems 4—42510
Lyapunov's theorem, multiple-valued mappings, subdifferentials of convex functions and integrals 4—37909
Malliavin calculus, appl. to nonlinear filtering 4—37623
modified Laguerre polynomials appl. to solution of integral equations 4—37293
multiprogramming, G/G/1 queue and two-stage cyclic models 4—26829
new approach to the solution of integral equation via block pulse functions 4—29487
nonlinear integral models, qualitative study, biological appl. 4—37795
one-dimensional telegraphic diffusion process, dwell-time distrib. 4—47980
optical solution methods 4—34096
singular integral eqns. with index equal to 1, numerical soln. 4—33757
spectrum estimation, information 4—32775
threshold autoregressive processes 4—32466

integral transforms *see transforms*

integrated circuit manufacture
Used for commercial manufacture only
see also masks; photolithography
computerised process line for automation 4—43276
die manipulation and mensuration system 4—43345
electronics company, computer aids 4—40950
factory automation system, K&S 5100, config. using hierarchical computer network 4—49246
flexible in-line robotic microelectronic assembly system 4—33389
flexible material handling automation in wafer fabrication 4—49278
hybrid, active trimming, microprocessor-controlled machine 4—43583
hybrid IC production using automated material handling 4—38231
hybrid ICs, CAD/CAM appls. 4—46306
hybrid microcircuits, pattern recognition techniques 4—47036
National Semiconductor, expansion in Scotland 4—28149
semiconductor fabrication process simulator, statistically based, FABRICS II 4—27601
semiconductor processing, mass spectrometers and chromatographs 4—38391
semiconductor processing, robotic alignment and inspection system 4—43349
SGS-ATES semiconductor industry, entry into systems manufacturing 4—28123
VLSI process parameter extraction, IC fabrication line 4—31638
VLSI productivity and process feedback 4—49279
VLSI wafer fabrication and process automation research at Stanford University 4—49281

integrated circuit technology

I^{2}L gate arrays, CADET chip analysis and diagnostic evaluation tool 4—25605
IBM printed circuit board design, manufacture and testing 4—40951
in-circuit LSI/VLSI testing, sequency processing 4—27627
in-circuit testing, test programs improvement using analogue simulation 4—36408
incomplete scan path, testability analysis 4—31590
intelligent assistant for test program generation: the 'SUPERCAT' system 4—31587
ISOT 1009 C automated test for digital printed circuit board inspection and diagnosis *(Bulgarian)* 4—25224
ISOT 1012C system for digital printed circuit board testing *(Bulgarian)* 4—25223
Josephson logic device, on-chip multiplexer oriented system for cct. testing 4—33971
linear and mixed semiconductor devices and PC modules, functional testing, computerised test work stations 4—43747
logic masterslice, design and testing using transparent I/O isolation guidelines 4—29692
logistics support for military systems, research and development 4—38656
LSI, on-wafer and on-module chip testing 4—29691
LSI and VLSI, test sequences generation using information theory approach *(Slovak)* 4—29709
LSI ATE, realtime level referencing system 4—43760
LSI memory error repair analyser *(French)* 4—29858
LSI yield equation characterisation from wafer test data 4—31504
LTS 2500 Family Board for LTS 2000 test system *(Italian)* 4—46961
M-S structure identification during synthesis of correct sequences for microprocessor *(Russian)* 4—49763
memory board testers simulating actual working conditions 4—43743
memory chips, reliability monitoring 4—25805
memory chips, universal physical memory bit fail map 4—44442
memory emulation functional testing system, GenRad GR 2720 *(French)* 4—43751
memory testers, product survey 4—29886
microelectronics development in GDR *(German)* 4—47022
microprocessor based boards, bypassing in-circuit testing 4—38849
microprocessor based boards and systems, new approach to post in-circuit testing 4—29415
microprocessor chips, failure simulation and detection, automatic generation of input data *(Russian)* 4—25534
microprocessor circuits, hardware fault simulator 4—44113
microprocessor testing, literature review *(German)* 4—49694
microprocessor testing methods using assembler instructions *(Italian)* 4—29652
microprocessor tests generation, CAD approach *(Slovak)* 4—38850
microprocessor-based tester for integrated circuit chips 4—49418
microprocessors, functional testing 4—49704
microprocessors and complex ccts., behavioural test method 4—25547
MIPS, single-chip microprocessor, design verification and testing 4—33940
modular benchtop system, LODESTAR 96, for analog/mixed technology IC testing 4—25235
MOS 64K dynamic RAMs, monitored burn-in 4—29837
MOS digital circuits, concurrent fault simulation 4—36415
MOS LSI digital circuits testing, fault effects 4—27694
MOS process, circuit simulation and performance parameters, automated testing 4—31650
MOS-based semiconductor memories testing technology 4—43742
MOS/VLSI custom chips, design verification/fault anal. using logic simulation machines 4—44227
Petri net test generation system for VLSI design of digital ccts. 4—27693
programmable logic circuits and components for compact design *(Swedish)* 4—29810
pseudorandom testing, probability statistical characteristics *(Russian)* 4—25587
RAMs, parallel pattern testing 4—44432
S^3, VLSI self testing using signature anal. and scan path techniques 4—31601
semiconductor chip test inhibit generator 4—38639
semicustom array family development 4—25606
semicustom IC gate array design verification 4—44221
semicustom IC testing, personal-computer-based ATE 4—49393
semicustom ICs, RCAD system with automatic testing capability *(German)* 4—46993
signature analyser, quasi-linear type, conjunctive feedback network technique *(German)* 4—34004
signature analysis, device under test, performance limits determ. 4—44199
signature analysis, error detection probability and optimisation *(German)* 4—34003
signature verifier for testing 16-bit microprocessors 4—33980
single chip store testing using GenRad 1734 tester *(Italian)* 4—29884
Sony CX 20052 flash ADC, high sampling rate performance 4—25572
Statistical Process and Device Simulator (SPADS) 4—31651
stuck-at fault model inadequacy for MOS LSI circuit testing 4—36345
telephone-handset device tester using System 3300 4—25231
Test Technology Workshop, conf., Minneapolis, MN, USA (Nov. 1983) 4—25604
testability analysis for VLSI cct. design 4—40985
testability measure to improve algebraic test generation 4—36346
TITUS design automation system, design rule checking, testability, test generation 4—51752
verification system for cell based design styles 4—31652
verification tests generation, shift register technique using level sensitive scan design latches 4—49761
VLSI, automated specification/qualification/test system using CAD tools 4—51758
VLSI, computer-aided test, methodology and computer aids, scan paths 4—49643
VLSI, functional testing and failure anal. using laser probe 4—49712
VLSI advanced research, conf., Cambridge, MA, USA (Jan. 1984) 4—33874
VLSI and software testing, intersection 4—45369

integrated circuit testing continued
VLSI board tester, combined in-circuit and functional testing of dense boards 4—49276
VLSI board testing, using an in-circuit tester 4—43744
VLSI cards in-circuit testing, using vector-control card 4—31526
VLSI circuits and systems, intelligent assistance for test program generation 4—27703
VLSI embedded RAMs, on-chip testing technique 4—50000
VLSI logic chip self-testing mechanism using combinational cct. generated pseudo-random patterns 4—38896
VLSI logic module test systems, test pattern technique and equipment compression *(German)* 4—44219
VLSI memories soft errors susceptibility determ.,using pseudo-analogue method 4—49965
VLSI process parameter extraction, IC fabrication line 4—31638
VLSI self-test using signature analysis and scan path techniques 4—25633
VLSI simulation and data abstractions 4—31599
VLSI test bottleneck, CAD and CAT merger 4—36356
VLSI test patterns generation and editing, using software emulator 4—31525
VLSI test systems, Genrad GR18 *(German)* 4—27624
VLSI tester for mixed signal chips and hybrids 4—36357
VLSI testers for high test speed, pin count and throughput 4—36355
VLSI testing, automated pattern recognition appl. 4—27706
VLSI testing, computerised equipment, MegaOne, architectural aspects and software programming aids *(French)* 4—43750
VLSI testing, design for testability, integrated approach 4—31600

MOS 64K dynamic RAMs, monitored burn-in 4—29837

integrated memory circuits continued
MOS DRAM, single-transistor cell, S/R amplifier sensitivity anal. *(Chinese)* 4—40935
MOS dynamic RAM, 128K word×8-bit, design and characts. 4—49994
MOS dynamic RAM, 256 K-bit, page-mode and nibble-mode capabilities *(Japanese)* 4—49984
MOS dynamic RAM, 256K, design with redundancy feature 4—44475
MOS dynamic RAMs, soft errors, influences of circuit design on characts. 4—39032
MOS memory device, charge-conserving bit line boost circuit 4—44447
MOS nonvolatile RAM, three-device cell design 4—39046
MOS RAM, soft errors and α particle emission 4—49951
MOS RAM, TTL input buffer with variable input levels 4—39041
MOS-based semiconductor memories testing technology 4—43742
MTL/I^2L memory cell 4—25807
multiport register file IC, LFR08 4—34083
NCR/32 microprogrammable chip set with mainframe-emulation capability 4—44111
NMOS double-poly 256K dRAM utilising 1X projection lithography 4—29867
NMOS dynamic RAM, 1 Mb device with on-chip voltage limiter 4—44480
NMOS dynamic RAM, 256K, design using metal-gate technology 4—44476
NMOS dynamic RAM, 256K, design using triple-diffused technology 4—49989
NMOS RAM, 64K, self-timed dynamic sense amplifier 4—44472
nondestructive readout memory cell, design with direct-coupled sense gate 4—50011
nonvolatile memory, review 4—49958
North Star RAM, doubling to 64K 4—25778
NOVRAM and EEPROM, data loss avoidance in power supply transitions, circuit design 4—49726
programmable logic circuits and components for compact design *(Swedish)* 4—29810
PROM, Cellatron fast punching machine *(Slovak)* 4—26347
PROM, junction-shorting, 40 ns 64 kbit 4—34170
PROM, shadow registers for simplified insertion of diagnostic codes 4—29856
PROM programming in single operation with the Data I/O 156A system *(French)* 4—29857
RAM, dynamic, 4K, internal structure anal. *(Spanish)* 4—29845
RAM cell with two write and multiple read lines 4—39047
RAM storage boards, how to save money *(German)* 4—49969
RAM tapered bit line for access time improvement 4—39040
RAMs, parallel pattern testing 4—44432
RAMs, reliability considerations *(French)* 4—44453
RAMs for virtual main memory, wafer scale integration aspects 4—34155
reliability monitoring 4—25805
reorderable content RAM array, CAM arrays appls. 4—49794
ROM, four-state, using multilevel process technology 4—34168
semiconductor memories, technology and reliability, review *(German)* 4—34162
sense amplifier and dual-phase output circuit 4—25803
sense latch triggering circuit 4—39043
SHRAM, standard RAM and nonvolatile memory combination, appl. to single-chip microcomputer *(Italian)* 4—49964
Sinclair wafer-scale integration project 4—41625
single chip store testing using GenRad 1734 tester *(Italian)* 4—29884
solid-state circuits, conf., San Francisco, CA, USA (Feb. 1984) 4—44034
SOS dynamic RAM utilising charge pumping characts. 4—39054
static bipolar RAMs, alpha-particle induced soft error rates 4—29871
static RAM, 1 Kb, subnanosecond design using HEMTs and DCFL circuitry 4—44459
static RAM, high speed, power dissipation reduction *(Japanese)* 4—49987
static RAM, soft-error induction by muons and pions, relative efficiency 4—25796
static RAM cct. for instant programming appls. *(German)* 4—25810
static RAM using high electron mobility transistors 4—29864
storage logic array, hardware compilation from register transfer level 4—46973
supermicrocomputer chips, standardization 4—44100
symmetrical chip memory package to enhance yield 4—44443
Test Technology Workshop, conf., Minneapolis, MN, USA (Nov. 1983) 4—25604
testers, product survey 4—29886
Texas TL77XXA voltage-monitoring switching circuit *(German)* 4—25536
torus memory implemented by CCD technology 4—39021
transputer, computer chip from Inmos combining processor, memory, and communications circuitry 4—25516
transputer chip from Inmos, provision of six separate interface channels 4—29657
U224D static 4K bit memory using CMOS technology *(German)* 4—49985
universal physical memory bit fail map 4—44442
VLSI board testing, using an in-circuit tester 4—43744
VLSI DRAMs, phys. limits 4—44464
VLSI embedded RAMs, on-chip testing technique 4—50000
VLSI memories soft errors susceptibility determ.,using pseudo-analogue method 4—49965
VLSI memory unit, CAD 4—31658
VLSI personalized embedded storage arrays, test methods 4—44445
VLSI RAM, double word line and bit line struct. 4—44481
write select scheme for Schottky-coupled cell with early upper word-line deselect 4—25801
GaAs 256-bit static RAM, ultra-low power design 4—25814
GaAs E-JFET RAMs, single event upset meas. 4—25795
GaAs MESFET 1K static RAM design and fabrication *(Japanese)* 4—44425
GaAs MESFET 1K static RAM fabrication technology *(Japanese)* 4—44426
GaAs MESFET struct. with shallow n^+ implantation and recessed gate for fast static RAM 4—25816
GaAs SDFL gate array with on-chip static RAM, design and performance 4—25490
GaAs static RAM, 1 Kb, using closely spaced electrode FETs 4—29869
GaAs static RAM, 1 Kb, fabrication, performance and bit yield 4—34186
GaAs static RAM, 256×4 bit 4—25817
GaAs static RAM, 4 Kb, design using MESFET DCFL 4—44458

integrated memory circuits continued
GaAs static RAM, 4K×1b, design using WSi_2 gate self-aligned technology 4—44457
GaAs static RAM using enhancement-mode JFET DCFL 4—25815
integrated optics

tracking system, adaptive interpolator algorithm 4−51803
uniform B-spline method, non-nodal interpolation 4−48008
vector stationary processes, robust prediction and interpolation 4−32723
warped surfaces design, interpolating process 4−27825

interpreters (program) *see program interpreters*

interpretive programs *see program interpreters*

intersymbol interference
140 Mbit/s binary system *(German)* 4−27708
code design, using iterative theory 4−32732
error bounds for intersymbol interference channels 4−28598
finite duration Nyquist signals, optimum design 4−28608
optical disc performance, unified measure, phase margin anal. 4−44550
pulse amplitude modulation, measure transformations, local times, and error probability 4−32717

invariance
decentralised eigenvalue placement property, homotopic invariance 4−37991
Hamiltonian systems, orbit structure, Lie transformation group actions 4−37966
narcissistic-number-generation and card trick programs 4−47466
nonlinear systems, controlled invariance 4−32545

inventory control *see stock control*

inverse Nyquist diagrams *see Nyquist diagrams*

invertors
3-phase induction motor drive control, invertor designs 4−38303
AC drives efficiency optimal control with PWM invertors 4−48937
AC drives with invertor-fed synchronous machines, battery powered, new control method 4−43144
AC road induction machine traction drives, fed by power transistor-thyristor invertors, dynamic performance 4−51681
advanced AC propulsion with high power GTO and direct digital control for electric rolling stock 4−43616
application in control systems *(Russian)* 4−42784
asynchronous machine-convertor cascade drive with current source invertor, speed control and performance evaluation 4−38342
asynchronous motor, invertor-fed, control via decoupling networks 4−38339
auxiliary bus commutated invertor for AC motor speed control, three phase cct. 4−48919
CAD package for invertor fed PWM variable speed drives 4−40916
circuit for ZX81 4−38868
clock oscillator cct. anal. utilising TTL invertor amplifiers 4−27658
closed loop control of invertor output voltage waveform 4−43099
CMOS dynamic merged load technology for ratioless invertor logic ccts. 4−49672
CMOS Schmitt trigger with wide hysteresis 4−33896
converter-fed synchronous machine with high performance dynamic behaviour for servodrive application 4−38347
CSI induction motor drive, analysis using digital model 4−51682
CSI induction motor drive control system 4−48930
current inverter, computerised impulse modelling of valve convertor system *(Russian)* 4−46902
current inverter in the sliding mode for induction motor control 4−43123
current source invertor commutation control using GTO thyristors 4−38332
current-fed inverter drives, microprocessor-based optimal PWM control fast computer modelling 4−38308
current-fed invertor drives, low-speed torque pulsations minimisation using PWM switching strategies 4−51662
DC invertor motor switching process control by keeping angle margin constant *(Russian)* 4−38298
DC to AC converter for controlled drives based on a novel high efficiency, high current transistor switch 4−38333
electric drives, control systems for frequency convertors with current invertor fed induction motors *(Polish)* 4−24669
flywheel energy storage unit, power transmission control 4−43178
induction machine supplied from three phase semicontrolled voltage inverter, computerised analysis *(Slovak)* 4−31457
induction motor, voltage-source inverter-fed type, field-oriented control, digital simulation 4−38282
induction motor drive, single phase, invertor-fed, anal. 4−38336
invertor chain test structure principle in testing MTL/I^2L memory 4−25592
line commutated invertor-synchronous machine, as variable frequency source for induction motor speed control 4−48887
low voltage inverter logic circuit 4−25492
MELUPS-MINI series of transistor-inverter-type small-capacity UPSs and power-system monitoring equipment using microprocessors *(Japanese)* 4−48923
microcomputer-based control system for an inverter supplying state feedback controlled induction motors 4−43139
microprocessor control of an asynchronous motor fed by an inverter *(French)* 4−24886
microprocessor-based reference current controller, PWM technique for invertor appl. 4−24867
MOSFET invertor, microprocessor-controlled design for solar energy system 4−24880
optimal microcomputer-controlled converter for feeding AC motors 4−43130

invertors continued

motorway traffic, hierarchical optimisation and control, excerpt from EEC report 4−43607
multi-time scales systems, modelling control and transient behaviour 4−48604
multimachine interconnected power systems, perturbation model, generalized 4−24854
multimodel interconnected systems with slow and fast modes, optimal coordination 4−33067
multiple criteria optimization with adaptive partition 4−41939
nonlinear, two-level optimal feedback control, application to synchronous machine control 4−42630
nonlinear mechanical systems, decentralised regulator and observer 4−33142
nonlinear systems, stability and aggregation equation *(Chinese)* 4−48588
nonlinear systems with time-delay, optimal control 4−28821
nonlinear time-delay systems, computational algorithm 4−38097
online control, structuring of data description in relational databases 4−47219
online steady state control, joint coordination method appl. 4−42655
optimised control, point meas. 4−33338
parameter optimisation by constraints 4−42664
Petri nets, stepwise refinement 4−29583
PLANNER program package for large scale production and transportation problems 4−24459
PMSS approach to large-scale optimal control problems 4−37934
power system, decentralised suboptimal control using modified Bellman-Lyapunov equation 4−48957
power system, structural problem and research illustration *(Korean)* 4−48918
power system stability enhancement using static phase shifters 4−43155
power systems, practical realisation for suboptimal prime mover and excitation controllers 4−48958
power systems, software for automatic dispatcher control system 4−33283
power systems, transient security assessment method based on pattern recognition techniques 4−51697
quasi-optimiser system overview 4−24250
real time control, conf., Patras, Greece (July 1984) 4−42651
real time control 4−42652
real time database model design 4−30895
realtime control appls. to power systems, recollections of evolution 4−29007
reduction of large-scale systems via generalized Gramians 4−37892
reliability and fault detection techniques 4−42654
resource allocation in two level systems with perfect information at centre and locally optimal behaviour of subsystems 4−48373
robotic systems, practical stabilisation by decentralised control 4−33695
robust control via cooperative decentralised control method 4−48601
seawater desalination plant control, Kent Process Control experience 4−48806
singular perturbations and time-scale methods in control theory, survey 1976-83 4−32992
social engineering system, overview and perspectives *(Korean)* 4−48597
societal planning systems, optimisation and optimum control of organisation 4−42560
Space Structure Control Problems uncertainty characterisation 4−33575
space structures, active control, introduction and overview 4−43649
space structures, control systems, ground testing facility 4−43650
space structures with stiffness control, response 4−38578
spacetime representations of computational structures 4−29582
stability analysis of systems whose subsystems may be unstable 4−33069
stochastic systems, optimal control methods 4−37665
stochastic systems, whirl decomposition based on substitution property 4−25431
strongly connected systems, automatic display of struct. *(Japanese)* 4−48048
structural control, design of optimal observers 4−42642
structure and control of systems with continuous moving elastic webs and multi-motor drives *(German)* 4−48981
structure control law design 4−37998
suboptimal control synthesis, linear aggregation method 4−42619
subsystem stabilisation in composite dynamic systems *(Japanese)* 4−37983
synthesis based on dynamic approximation *(Czech)* 4−24548
theoretical overview *(Korean)* 4−48595
traffic control system *(Korean)* 4−49302
training for the planning of large-scale control systems 4−47610
two dimensional large scale linear systems, deadbeat servo problem 4−42718
UK Central Electricity Generating Board power system control organisation 4−29098
unknown linear interconnected systems, decentralised stabilisation 4−48594
water distribution systems, optimal control by network flow theory 4−33235
water resources systems, hierarchical optimisation 4−42910
world energy consumption and world population, evolutionary analysis 4−42364

laser accessories
microcomputer-controlled scanning of a laser beam at constant speed 4−27364
narrowband dye laser with a large scan range 4−46661

laser applications *see laser beam applications*

laser beam applications
see also holography; integrated optics; laser beam machining; measurement by laser beam; modulation spectroscopy; optical communication; optical radar; patient treatment; plasma production and heating by laser beam; Raman spectroscopy; remote sensing by laser beam; spectroscopy; surgery
3D measurement system accuracy anal., laser/camera based 4−42932
automated process observation and monitoring in the case of high-capacity lasers *(German)* 4−43210
automated tunable diode laser monitoring systems 4−49428
CMOS static 4K RAMs, latch-up anal. using laser scanning 4−49999
computer generated holographic laser scanner for 2D graphics 4−30270
computer numerical control laser applications, microcomputer-controlled X-Y translator 4−29207

laser beam applications continued
computers in process control, cabling cost reduction, infrared laser communication system for noncritical appls. 4−24037
data coding for laser recorders 4−24316
digital heterodyne interferometer using phase modulation of Ar ion laser polarisation 4−49427
Doc Wheel tape-based optical mass memory system, 600 gigabyte capacity 4−29877
dye in polymer binder ablative optical recording medium, laser marking 4−44507
dye layers, pure amorphous solvent coated, optical recording at AlGaAs laser wavelength 4−44505
dye medium for diode laser ablative optical recording 4−44506
electric fan main body assembly line *(Japanese)* 4−24965
electrophotographic transfer printer, laser writing sub-system 4−26317
engraving of letters, numbers and graphics, microcomputer control *(Bulgarian)* 4−33643
flexible manufacturing system, laser station, Japanese project *(Japanese)* 4−24967
heavy duty loading machine, aimable laser time-of-flight range finder for rapid interactive scene description distributed control system 4−43510
holographic memory units using laser diodes, binary images *(Russian)* 4−50001
integrated laser manufacturing systems 4−43470
Japanese national project 'Flexible Manufacturing System Complex' 4−25018
laser diode printer, a-SiGe:H electrophotographic photoreceptor 4−50435
laser disks may be used as computer ROMs 4−34202
libraries and information centres, fibre optics and laser appl. 4−27237
logic gate array design, laser personalised 4−33983
memory systems using laser beam scanning, Megadoc and Optimen 4−29879
memory techniques, development trends *(Polish)* 4−34110
metal, laser-heated, eddy current monitoring and pot. process control use 4−29165
metal films, discontinuous, for optical storage, laser induced coalescence writing mechanism 4−44508
microfluorometer, pulsed laser, automatic, with high spatial and temporal resolution 4−40666
modular laser graphics projection system, animated laser show appls. 4−49865
multifunction document processor using flying spot laser scanner 4−26374
optical data storage *(German)* 4−25823
optical disc pre-groove dry process fabrication using laser light irrad. 4−44504
optical storage system developments and prospects 4−50003
optics in entertainment, conf., Los Angeles, CA, USA (Jan. 1984) 4−49864
PCB laser direct photoplotting without aperture wheels 4−47209
PCB laser pattern generation 4−47208
PCBs, laser guided robot assembly 4−33401
photochemical hole burning and its appls. *(Japanese)* 4−29874
plotter drawing instrument mechanics, drawing quality, laser miniaturization *(German)* 4−30340
PMMA, injection-moulded plastic substrates for laser beam memory 4−44533
polycarbonate, injection-moulded plastic substrates for laser beam memory 4−44533
polymer-metal bilayer deform. recording process, optical storage appls. 4−34201
POS shutterless laser scanner capable of class 1 operation 4−40281
printers, how they operate 4−45139
printing interactive time-sharing service 4−45140
process stream continuous and automatic analysis, IR tunable diode laser industrial appl. 4−49253
robot control, three dimensional linear motion control *(Japanese)* 4−38074
VLSI, functional testing and failure anal. using laser probe 4−49712
war games using laser beam systems 4−27122
wood industry, laser for sawing wood *(French)* 4−25119
Xerox 9700 laser printer 4−39484
CS_2-Te plasma polymerised film for laser beam memory 4−44534
Si, laser doping by dissociation of metal alkyls 4−36085

laser beam machining
computer numerical control laser applications, microcomputer-controlled X-Y translator 4−29207
cutting surface roughness *(Italian)* 4−51921
integrated laser manufacturing systems 4−43470
NMOS laser-programmable chip for language recognition 4−27669
robot-laser trimming of foam/vinyl dashboard 4−49033
textured optical storage media, threshold laser writing powers 4−50010
thin film resistor network laser wafer trimming, technique for hybrid DAC fabrication 4−29679

laser beam modulation *see optical modulation*

laser beam properties *see laser beams*

laser beams
see also holography; laser frequency stability
microcomputer-controlled scanning of a laser beam at constant speed 4−27364
polarisation degree measurement apparatus using TP801 microcomputer *(Chinese)* 4−46684

laser cavity resonators
No entries

laser frequency stability
narrowband dye laser with a large scan range 4−46661
AlGaAs, frequency stabilization by thermal and current feedback control 4−25254
CO CW laser two-mode multiline stabilisation using Fabry-Perot filter under analog and digital computer control 4−25262

laser hardening *see radiation hardening*

laser mirrors *see laser accessories; mirrors*

laser modes
CO CW laser two-mode multiline stabilisation using Fabry-Perot filter under analog and digital computer control 4−25262

logic CAD
16-bit CPU design realized by a hierarchical polycell approach *(Japanese)* 4−49706
ABEL, programmable logic design language 4−34987
ADLIB-SABLE hierarchical multilevel simulator for functional fault simulation 4−31608
airborne threat logic development for traffic alert and collision avoidance system 4−41148
AMOEBA−a totally symbolic approach to VLSI layout 4−31597
array designing, circuit optimisation and increased microprocessor throughput 4−38912
basic-assembler program for logic simulation *(Spanish)* 4−33999
behavioural simulation of LSI and VLSI circuits 4−36352
benchmark for logic simulators *(German)* 4−44216
bipolar LSI/VLSI gate array products, IBM design automation system 4−49780
bipolar masterslice cell array, design and CAD customisation 4−44058
Boolean function representation and combination using APL 4−43920
CAE needs and solutions for the mid 80's 4−51746
circuit design strategy using ternary vector lists as basic structure *(German)* 4−34005
CMOS custom logic with metal-oriented layout struct., CAD technique 4−44226
CMOS gate arrays, design methodology 4−31656
CMOS logic circuits, switching functions realisation using automated design system 4−49781
CMOS VLSI CAD, Calma/General Electric system 4−51747
compilation techniques in logic synthesis 4−44235
complex function logic simulators for VAX computers *(German)* 4−29698
complex multiprocessor systems, simulation using SIGMUS program system 4−29712
Concurrent Prolog as hardware description language *(Japanese)* 4−44228
control algorithms implementation, large-scale systems appl. *(Czech)* 4−25607
custom IC design, CMOS cell-layout compilers 4−49787
custom IC logic design workstation software 4−38904
custom ICs, development and CAD aspects *(German)* 4−36364
custom logic VLSI, hierarchical design automation system using standard cell methods 4−44231
custom VLSI, hierarchical workstation design approach 4−51748
design concepts for next generation logic systems 4−47041
digital hardware design automation, simulation, test vector generation and verification 4−29721
digital logic systems, computer-aided procedure for performing status loading validation 4−33995
digital MOS IC fault modeling 4−46972
ECL gate array family, characts. and design using FAIRCAD system *(Italian)* 4−49651
eight-value modelling technique for logic simulation of transmission gates and buses 4−25622
EMILIE 2 CAD system, interactive design checker by behavioural simulation on layout 4−29715
engineering workstation simulation accelerator 4−38907
FANSIM3 digital logic simulator, fault propag. techniques 4−29718
fast APL algorithm for logic minimization 4−51700
fault simulation using parallel value lists 4−29720
fault simulators 4−38903
FTL2 system, data-flow based behavioral-level simulation and synthesis 4−29716
fuzzy logic circuits, CAD-oriented synthesis, gate arrays *(Japanese)* 4−49778
gate array, subnanosec., 2000 gates, bipolar process, ECL 100K compatibility, CAD 4−29623
gate array CAD, Ferranti Semiconductors Silicon Design System 4−29697
gate array LSI, global routing algorithm appl. 4−49770
gate array LSI, heuristic algorithm for pin assignment problem 4−49771
gate array semi-custom ICs, using laser pattern generator and silicon compiler *(German)* 4−44218

logic CAD continued
gate array technology, GATEWAY microelectronic design exercise featuring CAD 4−49776
gate array testing using universal test program 4−25632
gate arrays, automated technique for IC personalisation technology conversion 4−25612
gate arrays, Bagel automatic layout system 4−49788
gate arrays, CAD system for current distrib. anal. 4−49789
gate arrays, computer aids, automation and UK5000 4−25621
gate arrays, design methodology using CMOS VLSI 1.2 μm double-level-metal technology 4−27633
gate arrays, integrated CAD system for semi-custom design 4−44233
gate-array design, manual vs. computer-aided *(German)* 4−38892
gate-array design using external CAE facility *(German)* 4−38902
global router for gate array 4−31619
GRAFCET, automatic design of VLSI ccts. 4−47034
GRANTS interactive circuit schematic specification for logic simulation programs 4−51718
graphic workstation appls. *(Swedish)* 4−27625
hardware description from block diagrams [logic] 4−44232
HCMOS gate array design approach 4−31655
HCMOS gate arrays, CAD using precharacterised macrocells 4−49790
hierarchical standard cell approach for custom VLSI design 4−46968
HILO-2 logic design verification, fault simulation and test vector generation system 4−49779
HMOS gate array, design and layout using CAD 4−49653
HP 64000 universal emulator of microprocessors increase designer productivity *(Italian)* 4−44222
IC CAD conf., Santa Clara, CA, USA (Sept. 1983) 4−31575
IC design using personal computers 4−27617
in-circuit emulator for Zilog system 8000, design and advances *(Italian)* 4−44223
incomplete scan path, testability analysis 4−31590
Lambda from Metheus, use in both big and small CAD 4−29710
large digital ccts., timing verification 4−25629
laser personalised gate array design 4−33983
Lattice Logic Exert switch-level simulator 4−40964
LM-2 logic simulation language and its program *(Chinese)* 4−49749
logic analysers as personal computer peripherals 4−29696
logic-development-and-anal. systems, features of modern examples *(German)* 4−38901
LOMACH-MIXED, logic simulator of mixed diagrams 4−44230
LSI computer logic arrays, average connection length and number of route channels 4−25615
LSINET, logic and timing simulation program for LSI/VLSI ccts. *(German)* 4−44229
macrosimulator, MICAS, for digital ccts. 4−27671
masterslice gate array topology, highly-routable structs. design 4−49777
megalogician IC simulator, for up to 10^6 gates, design and testing *(French)* 4−25610
memory- and logic-programming 4−27613
microcomputers, backplane-based, automated configuration 4−51842
microelectronic gate array designed to give efficient automated circuit implementations 4−25627
microprocessor control part design 4−31630
microprocessor tests generation, CAD approach *(Slovak)* 4−38850
microprocessor-controlled digital controllers, logic control algorithms implementation 4−42817
MOS bidirectional transmission gates, event-driven model 4−25618
MOS custom ICs, fast pass-transistor simulation 4−29703
MOS digital LSI simulators, design and implementation 4−29713
MOS ICs, logic simulator, LMOS II 4−29711
MOS VLSI circuit, fault modelling and logic simulation 4−29719
MOS VLSI logic function extraction 4−31625
MOS/VLSI custom chips, design verification/fault anal. using logic simulation machines 4−44227
MOS/VLSI custom/semicustom devices, ACT CAD system *(Italian)* 4−49772
MURPHY, logic simulator for NMOS and CMOS VLSI ccts. 4−29717
N.mPc: a study in university-industry technology transfer 4−29702
PALASM2 PAL design, simulation and verification software 4−38905
personal computer software packages 4−36348
PLA, bipartite folding and partitioning 4−46971
PLA based finite state machines, synthesis 4−31629
PLA design, Espresso-II program for logic minimisation 4−49784
PLA synthesis system with technology independence 4−49785
placement procedure for polycell VLSI circuits 4−31596
PLAs, functional testable design 4−25628
Plex microcomputers, simulation and verification 4−29714
Plex Project: VLSI layouts of microcomputers generated by a computer program 4−31595
PLPL, programmable-logic programming language for CAE stations 4−25609
Prime CAD/CAM Electronic Design Management System *(German)* 4−40942
programmable-logic CAD, use of Advanced Boolean Expression Language 4−44217
PROLOG synthesis 4−31530
PROM programming for combinatorial logic *(German)* 4−25786
Realchip system for logic simulation 4−36347
RSIM logic-level timing simulator 4−27659
SAMSON, event driven VLSI circuit/logic simulator, algorithms 4−51754
self-testing and self-repairing digital systems 4−25634
self-timed state machine implementation in logic ICs, CAD, ASSASSIN system 4−44234
semicustom circuits, extraction of interconnect delays from computer generated layouts 4−49786
semicustom IC gate array design verification 4−44221
semicustom VLSI and LSI CAD tools, technologies and design steps 4−25619
silicon compilers for chip design 4−31541
simulation of digital electronic circuits *(German)* 4−33994
simulation techniques, rel. to prod. problems *(Spanish)* 4−33998
simulators, selection and benchmark testing 4−29722
Software Data Book and Design Verifier Software 4−38906
storage logic array, hardware compilation from register transfer level 4−46973
structured logic, parallelism in automatic placement problem 4−25630
switch-level model and simulator for MOS digital systems 4−25613
systolic algorithms for string manipulations 4−33997

logic CAD continued
systolic multipliers for finite fields GF(2^m) 4−33996
technology updatable microcomputer 4−31657
temporal logic based hardware description and its verification with PROLOG 4−31531
test sequences generation for LSI and VLSI ccts. testing, using information theory approach *(Slovak)* 4−29709
Texas Instruments transportable design utility using hardware description languages 4−25626
timing evaluation of logic designs 4−25624
TRUE: a fast detectability estimation system 4−31589
ULA gate arrays, Ferranti's silicon design system for autolayout 4−25625
verification and testing machine 4−31585
VLSI, classification and comparison of different placement strategies 4−25631
VLSI CAD system 4−27664
VLSI circuit, description and reasoning in temporal logic 4−51715
VLSI circuit design, survey of commercially available simulators 4−36351

matrix algebra continued
BBC model B microcomputer, MaTrix transformation program, in BASIC 4—46655
biinfinite matrices, dimension of 4—29444
canonical correlations, predictive efficiency criterion for stochastic process, appl. 4—32785
canonical forms under dynamic compensation and zero structure at infinity 4—33018
chain products computation 4—38746
characterization of positive definite and semidefinite matrices via quadratic programming duality 4—28371
coherent optical techniques for diagonalization and inversion of circulant matrices and circulant approximations to Toeplitz matrices 4—25721
combinational networks, error detection by use of codes based on Hadamard matrices 4—32705
combined direct-iterative method for certain M-matrix linear systems 4—28639
complete implication matrix in structuring complex systems 4—47943
complex covariance matrix inversion with a resonant electro-optic processors 4—34098
component connection model for sensitivity matrix calculations of linear systems 4—42575
computer aided design of robots and workspace layouts 4—47202
condition estimates of matrix 4—32425
constrained matrix problems, appl. of block successive overrelaxation method 4—37376
control system model matching with improved transmission of measuring errors 4—28734
convergence of matrices generated by rank-2 methods from restricted β-class of Broyden 4—37281
correlation matrices generation 4—32452
correlation type matrices, eigenvectors estimation using adaptive algorithms 4—48289
criterion of controllability based on matrix symmetrization 4—37857
cross-Gramian matrix, fundamental prop. 4—41817
deadbeat control, collection of numerically reliable algorithms appl. 4—37967
diagonal predominance property, block analogue 4—38745
diffusion problem, solution on vector computer, overrelaxation, multigrid and preconditioned conjugate gradients algorithms appl. 4—25365
digital filters using spline interpolation *(German)* 4—25348
digital optical architecture for performing matrix algebra 4—44335
discrete time quadratic matrix inequality, geometry of set of solutions 4—33080
dyadic determinant function 4—46641
eigenvector matrices of symmetric tridiagonals 4—37283
electric vehicle DC shunt motors, chopper control anal. using augmented state transition matrices 4—48941
electron microscopy, analytical crystallographic calc. methods used in RAD group of computer programs 4—36063
entropy power inequality and Brunn Minkowski inequality, similarity 4—32759
exact model matching problem, appl. of proper rational matrix Diophantine equations 4—37513
exchange property for matroids, appl. to max-min problems 4—37285
fast approximation of dominant harmonics 4—32458
fast matrix inversion using VLSI architectures 4—25371
fast parallel and sequential computations and spectral properties concerning band Toeplitz matrices 4—33723
fast Toeplitz orthogonalization, least-square problem 4—29450
FFT, matrix interpretation for mutually simple factors 4—43914
finite element method, parallel processing usefulness rel. to response time 4—25366
finite irreflexive relation, algorithms for generating and ranking the solns. 4—37380
finite moment problem, approximate soln. 4—25344
finite-element matrix partitioning for computer storage 4—27335
functional estimation in control theory 4—38102
Gaussian mean vectors, a posteriori estimation 4—48181
generalized Hadamard transforms and linear filters 4—41819
graph structure simplification, Boolean matrix aided 4—47982
graph theory and microcomputers 4—32494
Hamiltonian systems, orbit structure, Lie transformation group actions 4—37966
Hankel-matrix approach to invertibility of linear multivariable systems 4—33066
hidden surface elimination algorithm and perspective transformation 4—30514
high-level Petri nets and invariants 4—37356
identifying Morishima and anti-Morishima matrices and balanced digraphs 4—37355
ill-conditioned, banded least squares problems, regularisation 4—25341
ill-conditioned least-squares problems with triangular Toeplitz matrix, regularisation 4—25340
image processing, matrix quantiser use 4—48244
implicit mapping, continuity of 4—28350
independence systems, classification 4—37695
induced metrics and iterative factor algebras 4—25359
inexact linear programming with generalized technological matrix sets 4—24231
inner product computation, efficient bit-level systolic arrays appl. 4—33737
interclass Mahalanobis distance, semi-invariants anal. 4—48176
interpretive structural model for complex systems, process/storage 4—48095
interval matrices, stability 4—33024
interval matrices, sufficient stability conditions 4—37275
inverse function theory, numerical aspects 4—33145
inverse Sturm-Liouville problem, numerical method 4—25364
inverting graphs of rectangular matrices 4—41873
iterative optical vector-matrix processor 4—34104
Karhunen-Loeve expansion, spectrum estimates 4—32770
Karhunen-Loeve inverse problem 4—41820
large scale networker, decomp. using bit-serial parallel processor *(Japanese)* 4—25542
linear, multivariable systems, canonical forms calc. 4—42638
linear complementarity problem, PL homotopy method appl. 4—37288
linear matrix equation, l_p-solution 4—29482
linear multivariable constant systems, transformations between canonical forms 4—42634

matrix algebra continued
linear time variant systems, reduction of redundant data in quadratic cost formulation 4—33014
linear transformations performed by an electro-optical processor 4—34103
LU-factorisation with small pivots, existence and computation 4—37278
MACSYMA-generated closed-form solutions to some matrix Riccati equations 4—40579
matrix transformations in lower level computer graphics course 4—31812
matrix-matrix multiplication with electrooptical engagement array processors, algebraic operation appl. 4—33736
minimum energy control of 3-D linear systems 4—28786
multi-input linear system, eigenvalue assignment algorithm 4—42643
multidimensional systems, matrix transfer function derivation 4—42717
multimachine power system, optimal stabilisation through matrix sign function theory 4—48956
multiplier penalty function and Hessian matrix, optimal power flow solution *(Chinese)* 4—33255
multiterminal DC and AC power system networks, load flow, diakoptics and decoupling 4—31492
multivariable control systems, pole assignment and stabilization using output feedback 4—48599
multivariable stochastic linear systems, canonical realisation of impulse response matrix *(Chinese)* 4—24550
n-variable bilinear transformation, general prop. of associated matrices 4—32430
neighbouring matrices with quadratic elementary divisors 4—37279
new approach to the solution of integral equation via block pulse functions 4—29487
Newton-Raphson finite element programs for axisymmetric vector fields 4—25367
nilpotent Boolean matrices, transitive reductions 4—32427
noise corrupted matrix, singularity determination 4—32589
nonnegative real symmetric definite matrix, conditions for determ. from shortened versions 4—32431
norm sensitivity of characteristic roots, conditions for minimisation 4—37878
norm sensitivity of characteristic roots, conditions for minimisation 4—42568
normal matrix, perturbation of eigenvalues *(Chinese)* 4—47941
numerical optical processing, integrated optical approaches 4—49914
optical matrix-vector multiplier 4—38985
optimal block-scaling of matrices 4—37284
optimum partitioning of 0-1 integer sets via sequential aggregations 4—24243
oriented matroids, polyhedral theory 4—37374
parallel MIMD machine for matrix computations 4—44259
partial fraction decomposition, 2-D, existence testing 4—37625
partial Sturm sequences strategy for determ. of eigenvalues of symmetric function 4—49511
partitioning sparse matrix representation complexity 4—33838
periodic Jacobi matrices reconstruction 4—24151
periodic Riccati equations, periodic solutions 4—42569
Petri net approach to enumerating all circuits of a graph 4—37370
planar arrays computational anal. procedure 4—47006
polynomial matrices, division algorithm 4—41814
polynomial matrix operations algorithm 4—32542
polynomials, book 4—25370
positivity in complex spaces and its application to Gershgorin discs 4—37282
power system, steady state stability analysis based on eigenvalues of matrices. *(Russian)* 4—28763
power system fault analysis, bus impedance matrix method, computer program and algorithm *(Korean)* 4—36288
power system load flow anal. using VLSI systolic arrays for matrix triangulation 4—51686
power system short circuit analysis, computerised solution using piecewise algorithm *(Chinese)* 4—46926
power system steady state stability, matrix eigenvalue analysis 4—33021
power systems, steady state analysis, mathematically based simulation and optimisation method *(Russian)* 4—36304
production systems adaptability anal. to alternative planning objects 4—42415
profile minimisation algorithm for sparse matrix 4—43903
proper rational matrix Diophantine equations and the exact model matching problem 4—32433
public key distribution in matrix rings 4—30547
quadratic equation solution 4—37902
quadratically convergent method for computing simple singular roots 4—29473
qualitatively invertible matrices 4—41810
Quillen-Suslin theorem and the structure of n-dimensional elementary polynomial matrices 4—37277
random transition probability matrices with appl. to Markov chains 4—41863
rank degeneracy of matrix 4—32426
rapid unbiased bipolar incoherent calculator cube 4—34099
rectangular Boolean matrix, transitive reduction 4—49538
recursive relations for block Hankel and Toeplitz systems, direct recursions 4—43888
recursive relations for block Hankel and Toeplitz systems, dual recursions 4—43889
regular splittings of matrices 4—37280
regularization of solutions of nonlinear equations with singular Jacobian matrices 4—33740
relational database model extension to probabilistic data, generalised arrays 4—45878
Riccati equation and stabilisation 4—33033
Riccati equations, complete global phase portrait 4—33059
robot vision, decomposition of transformation matrices 4—47190
root clustering of real matrix in sector 4—28317
rotation matrices 4—30492
selection and ranking, sorted matrices 4—26551
self and mutual admittance of bridge circuits, matrix method for computerised anal. *(Russian)* 4—51708
shell, thin stiffened, resonance response, nonlinear interactions 4—40598
shortest path algorithms, appl. to matrix scalings 4—37371
signal processing, linear complexity fast algorithms for a class of linear equations 4—42293
skew polynomial fractions, linear discrete time 4—33120
Smith normal form of an integer matrix, comparing algorithms 4—41912
space-time trade-offs for banded matrix problems 4—33850

multi-access systems
  asynchronous multiple access communications, optimum sequence detection 4−32720
  auctioneer's problem, LAN, appls. 4−26204
  broadband multi-access techniques 4−44868
  capacity allocation scheduling 4−39396
  channels, conflicts, deterministic resolution, lower bound on needed time 4−38619
  coding and decoding, theoretical anal. 4−25946
  collision resolution algorithm for a multiple access channel 4−39394
  collision resolution protocols when collision multiplicities are observable 4−39393
  CSIRONET access from OTC MIDAS service 4−41723
  CSMA/CD protocol with backoff algorithms, perform. anal. 4−39360
  CSMA/CD/MPD access control method in bus-type local area networks for integrated data and voice *(Japanese)* 4−26144
  DP network, identification technique for user/job correlation 4−30221
  DP network, three-level user identification 4−30222
  finite user multiaccess, monotonic throughput improvement 4−39395
  frequency hopped multi-access channel, decoding error probability of Einarsson-code 4−42199
  handoff assigned multiple access protocol for computer communication networks 4−26172
  HYMAP, hybrid multiple-access protocol for LAN 4−30245
  LAN, high speed, using spread spectrum code division multiple access techniques 4−34538
  LAN protocols with multiple channel system and multiple access 4−26103
  LAN with multiaccess and decentralised distribution for 2 Mbit/s *(German)* 4−34542
  local area bus networks, traffic history window multi-access protocol 4−26160
  local area network for integrated voice/data communications, adaptive multiple access protocol 4−26200
  local area radio intercom networks, development 4−26171
  local communication, networks, with subchannel, traffic characts. of HDLC procedure *(Japanese)* 4−39389
  microcomputer I/O bus bandwidth dynamic allocation scheme 4−39144
  microprocessor based access controllers 4−44848
  modem arrays for multiple access to databases 4−26089
  multiaccess in a nonqueueing mailbox environment 4−45829

multi-access systems continued
multichannel CSMA-CD protocols, throughput and delay characts. 4—26205
multihop packet radio networks, approximate throughput and delay anal. 4—26064
multiple-access protocols, performance evaluation 4—30188
noisy radio channels, analysis of shared access protocols 4—33620
Northstar Dimension, multi-user system 4—50050
packet-switching multiple-access channel with power capture, throughput-delay performance 4—50187
R32 standard software *(Polish)* 4—36502
radio data networks architecture with monitored multiple access 4—39314
random-access systems with free or blocked channel access, Q-ary collision resolution algorithms 4—39397
satellite communications, layer model and error control 4—26156
satellite system, integrated network control and performance monitoring 4—25220
slotted ALOHA system with go-back-N ARQ scheme, dynamic behaviour study *(Japanese)* 4—39390
stack algorithms for local area networks 4—26203
star network with collision-avoidance circuits 4—26206
supermicrocomputer design considerations 4—30064
supermicros, multi-user personal computers 4—25850
synchronous multiple access protocols with partial reservation channel 4—30247
TDMA, demand assignment appl. 4—25219
TDMA system, test and maintenance facility design concepts 4—27748
telephone networks adaptive capacity allocation, SS/TDMA system appl. *(Japanese)* 4—24379
viewdata microcomputer access modems and acoustic couplers 4—40371
VS local network, Apollo system, configs. and protocols *(German)* 4—39367

multichannel analysers *see pulse height analysers*

multidimensional digital filters

3-D recursive digital filters, design 4—38953
design and implementation for signal processing appl. 4—28632
stability threshold calc. 4—42274
wavefront tracking through adaptive linear prediction 4—28629

multidimensional systems
2-D exact model matching 4—32546
affine systems, controllability properties 4—33011
CAD of digital controller, using quadratic criterion, recursive method 4—48539
coefficient estimation for difference eqns. describing multidimensional dynamic process *(Russian)* 4—24246
digital control of three-dimensional linear mechanical motion system using laser *(Japanese)* 4—38074
dissipative hyperbolic distributed parameter systems with finite dimensional controllers, feedback control 4—33130
disturbance decoupled observers for two dimensional systems *(Japanese)* 4—38073
finite dimensional filter, nonexistence results 4—42206
finite dimensional linearised dynamical systems, adaptive controller design 4—42687
fuzzy control algorithm design, linguistic rules decomposition 4—44031
homeothermic animal temp. regulation, five-dimensional dual butterfly catastrophe model 4—24485
infinite dimensional linear systems, parameter identification 4—37463
linear distributed-parameter systems, closed loop exponential stability with finite dimensional controller 4—33121
linear feedback system, robustness optimisation 4—42716
linear space invariant two-dimensional convolution models, matrix equations 4—47942
linear time-varying infinite-dimensional discrete-time systems, stability theory 4—42695
linearised automatic control systems, correlation anal. *(Russian)* 4—42714
matrix transfer function derivation 4—42717
MHD, equilib. bifurcations, automatic control influence 4—49459
minimum energy control of 3-D linear systems 4—28786
multivariable feedback system, robustness optimisation in Hankel norm space 4—37980
multivariable two-dimensional systems, decoupling, linear state feedback controller determ. 4—24558
nonlinear systems, controllability in infinite dimensions 4—28823
Observers for 2-D systems with unknown disturbance *(Japanese)* 4—32552
oscillatory third-order systems, time optimal feedback control 4—33051
probabilistic fuzzy controllers synthesis 4—42708
PWR once-through and recirculating steam generators, multidimensional model and THEDA-2 computer code 4—27864
robot manipulators, appl. of 3D linear discrete models 4—25332
second order evolution equations with damping, feedback control 4—33133
separability assignment problem 4—38066
separable denominator 2D systems, structural decomposition *(Japanese)* 4—28756
simple-structure regulating device, synthesis *(Russian)* 4—24579
spectral cluster points, relation to H^p spaces 4—37860
stability test, proof and generalisation of theorem 4—42715
stability tests, multivariable polynomial zeros 4—37908
three-dimensional linear systems 4—24255
two dimensional large scale linear systems, deadbeat servo problem 4—42718
two dimensional systems, pole assignment 4—33124
two dimensional systems, regulability tests 4—38060
two-dimensional high-order time-invariant linear systems, optimal model reduction technique 4—24254
two-dimensional multivariable systems, invertibility 4—42640
two-dimensional systems, observability 4—33132
variable structure systems, global stability 4—42705

multimeters
assembly workcell for multimeter subassembly 4—33368
compensation of measurements series *(German)* 4—51468
digital hand-held and microprocessor controlled autoranging models by Keithley *(German)* 4—25238
digital measuring instruments, impact of microprocessors *(German)* 4—29394
digital multimeter, D 3745, testing and measuring functions *(German)* 4—29395
digital multimeter, Philips PM 2519 model, design using I^2C serial bus technology *(Italian)* 4—49397

multimeters continued
digital multimeter-oscilloscope with LCD screen and storage *(Czech)* 4—24646
digital type, config., operation and microprocessor control *(German)* 4—49399
E&CM Hi-Res computer, multimeter program, in 6809 machine code/assembly language 4—31446
Keithley 175 autoranging multimeter with digital calibration *(German)* 4—33184
microcomputer based instruments and meas. systems *(Slovak)* 4—25228
Philips PM 2618 X multimeter *(Dutch)* 4—33182
Philips type PM 2518 hand-held multimeter with novel display *(German)* 4—38141
selection guidelines 4—38967

multiple processor systems *see computer networks*

multiplex transmission *see multiplexing*

multiplexers *see multiplexing equipment*

multiplexing

data transmission via satellites, dynamic multiple access techniques *(German)* 4—33613
display information collection from separate points, multiplexing used to reduce cabling *(German)* 4—28873
high-speed byte multiplexed bus, arbitration logic 4—44842
industrial automation through distributed control, control hierarchy for current and future needs 4—49248
microprogrammable channel controller for ES computer 4—26039
processor/memory two-card system, using multiplexed addresses 4—34174
solar heating system control by multiplexed logic controller 4—28977
space (air/ground) systems, influence of microprocessors 4—41030
two-wire full duplex baseband modem, microprocessor-based, control signalling 4—25712

multiplexing equipment
avionics appl. of MIL-STD-1773 bus, multiple speed data rate transmission concept 4—34446
CompuPro MPX-1 multiplexer channel 4—25975
control-pad multiplexing cct. for control of six functions over two wires 4—33174
data acquisition appls., multiplexing and signal conditioning using monolithic monitors 4—28872
data bus simulator, for multiprocessor design analysis 4—36525
data processor multiplexing control unit interface to word processor display 4—39273
DEC computers, communications multiplexers, selection 4—26125
device-level control bus for I/O devices in a data processor 4—44839
Digital Multiplexed Interface, PBX to computer interface standard 4—30175
Elliot Company data communication network using switching statistical multiplexers 4—44866
focal plane - processor interface studies for large mosaic focal planes 4—49863
front end processor for high speed packet multiplexed line *(Japanese)* 4—50315
hi-Z Data In Buffer IC 4—49975
high-bandwidth video information transfer in military aircraft, FDM system model 4—51789
industrial plant communication and control using bus systems *(German)* 4—29115
integrated system control routing architecture for AO&M information transfer 4—25175
integrated voice/data hybrid-switched multiplex structure, performance anal. 4—44793
interface for MC 6809 and 146818 RTC 4—39282
local area data transport networks, support services 4—26189
low power N-way analog multiplexer 4—25560
market survey of data communication equipment 4—39328
MIL-STD-1553D databus, appl. to general aviation aircraft 4—38554
multifunction modems and multiplexers 4—30103
multiplexer and cluster controllers for IBM networks 4—50256
programmable digital input multiplexer for digital data gathering 4—45022
review, market dynamics 4—39321
Siemens 300-R30 minicomputer I/O multiplexer *(German)* 4—34449
synchronous data link control adapter multiplexer 4—34425
T1 multiplexers, selection guide 4—25969
telecom manufacturing, automatic testing 4—49414
Telemekhanika Institute (Moscow) DP system *(Russian)* 4—44857
ternary multiplexer using binary gates, ternary multiplier realization 4—33875
value added networks, remote equipment control 4—26192
voice and data packet integration on a transmission link, using multiplexing 4—44835
ZD-A3 TDM system for data transmission terminals 4—45118
ZX81 multiplexed BCD four-digit adaptor 4—26003

multiplier phototubes *see photomultipliers*

multipliers, frequency *see frequency multipliers*

multipliers, voltage *see voltage multipliers*

multiplying circuits
antilog and log amplifiers for modelling of exponential functions *(German)* 4—29669
area-time optimal VLSI integer multiplier with minimum computation time 4—43980
array multipliers, easily testable VLSI design 4—49662
CMOS 16-bit-slice family, digital signal processors 4—33910
CMOS 16-by-16-bit multipliers, IDT 7216, IDT 7217 4—44341
CMOS floating point multiplier, 32×32 bit, design and characts. 4—49834
CMOS floating-point multiplier and ALU chips, ADSP-3210 and 3220 4—33883
CMOS parallel multiplier, compact clocked with very high throughput rate 4—49671
CMOS parallel multiplier using Booth's algorithms and Wallace tree ccts. 4—49832
CMOS/SOS multiplier, asynchronous 8×8 bit expandable type, GP503, config. and I/O device appl. 4—49822
CMOS/SOS parallel multiplier, 16×16 bit, design and characts. 4—49835
complex multiplier using residual number system *(Korean)* 4—38941
digital optical architecture for performing matrix algebra 4—44335

multiplying circuits continued

  power system control, chaos in the swing dynamics 4—38349
  pulse frequency modulated position control, design procedure 4—48648
  recursive identification technique, nonlinear process control appl. 4—42727
  robot arm trajectory controller design 4—33198
  robot servomechanisms, online computer control 4—42586
  robotic manipulator, multivariable control 4—43870
  robotics, nonlinear feedback control appl. 4—33700
  robust nonlinear control of robotic manipulators 4—38719
  robustness properties: multivariables, nonlinear, stochastic optimal regulators 4—33055
  sampled data systems, discrete-describing functions of sector nonlinearity and limit cycles *(Japanese)* 4—48619
  second order plant, time optimal control 4—42728
  self-tuning controller based on pole placement algorithm, implementation 4—25113
  simultaneous stabilisation 4—38093
  singular perturbations and time-scale methods in control theory, survey 1976-83 4—32992
  spacecraft angular momentum, optimal nonlinear feedback regulation 4—38549
  spacecraft control system for large attitude manoeuvres 4—43647
  spacecraft slew maneuvers, nonlinear feedback control 4—49331
  stability and rationality 4—42722
  stability improvement by feedback 4—33136
  stability of systems including online computer 4—42736
  state affine identification methods, appls. to elec. power plants 4—29009
  stepping motor, pulse timing and torque control algorithm 4—29096
  stochastic systems, lower bound on state estimation performance 4—38042
  suboptimal adaptive controller for nonlinear objects, analytical form 4—37941
  symmetries in decomposition into subsystems 4—33146
  synchronous generator control system design 4—29058
  three factor system with incomplete information, impulse control 4—28822
  time varying multivariable system, sliding controller design 4—42725
  time-varying linear systems, global reachability with control constraints 4—38055
  triangular decoupling problem for nonlinear control systems 4—38100
  two step compensation theorem 4—38095
  uncertain linear systems, nonlinear state feedback control 4—38568
  unity-feedback systems and Q-parameterisation 4—42723
  wheel tractor, automatic steering controller *(German)* 4—43596
  Wiener type nonlinear processes, on-line identification and adaptive control 4—33089

nonlinear differential equations
  CMOS static RAM cells, analytic expression for critical charge 4—25797
  computer assisted solns. 4—46698
  contractivity of locally one-dimensional splitting methods 4—49514
  fourth-order finite-difference methods for two-point boundary-value problems 4—33744
  fourth-order nonlinear ordinary differential eqn., iterative methods 4—25385
  genetics, freq.-dependent selection, soln. of difference eqn. 4—42508
  globally stable periodic solns., system synthesis, Lyapunov techniques 4—37906
  group explicit method for the solution of Burger's equation 4—29483
  Hermite-Pade approx. theory, invariance properties 4—43892
  industrial robot position control analysis, using nonlinear multivariable differential eqns. *(German)* 4—33436
  MACSYMA-generated closed-form solutions to some matrix Riccati equations 4—40579
  nonlinear boundary-value problems, positive solns. 4—38755
  nonlinear integral models, qualitative study, biological appl. 4—37795
  optimal stochastic control involving impulse and switching actions 4—37965
  optimisation, appl. to sciences 4—37451
  porous mechanism, diphasic flow, nonlinear partial differential eqns. *(French)* 4—24722
  Runge-Kutta algorithm, cartesian robot arm, dynamic simulation appl. 4—41062
  simulation, low-cost hybrid method for implementing delays and convolution integrals on analogue computer 4—43910
  synchronous generator, static power convertor-fed, characts. determ. 4—40904
  variational problems, soln. by nonlinear transformation 4—29475
  variational-iterative scheme applied to Burgers' equation 4—41902

nonlinear equations

  automatic solving by computer program *(Japanese)* 4—51471
  bordered singular systems, soln. using deflation and block elimination 4—25363
  cable roof, pretensioned, nonlinear static response, dynamic relaxation anal. 4—41090
  difference Newton-like methods under weak continuity conditions 4—49499
  fixed point algorithm, decomposition method and acceleration techniques *(Japanese)* 4—38807

nonlinear equations continued
fixed point algorithms, improving computational efficiency 4—37294
free boundary problems with nonlinear source terms 4—33742
higher order method for determining nonisolated solutions of a system of nonlinear equations 4—29474
Kevorkian's decomposition method, quadratic convergence property 4—49500
liver kinetics, substrate conc. minimisation problems 4—42510
matroid theoretic approach to the structural solvability of a system of equations *(Japanese)* 4—48049
monotone explicit iterations of the finite element approximations for the nonlinear boundary value problem 4—33730
operator equations solving, modified Galerkin's method appl. 4—38748
optimal solution of nonlinear equations satisfying a Lipschitz condition 4—29476
Poisson equations, internal arithmetic approach 4—33739
pressure loads, displacement dependent, nonlinear finite element anal. 4—40600
PWR once-through and recirculating steam generators, multidimensional model and THEDA-2 computer code 4—27864
quadratically convergent method for computing simple singular roots 4—29473
redundant eqns., soln. *(Chinese)* 4—49498
regularization of solutions of nonlinear equations with singular Jacobian matrices 4—33740
root finding, BASIC program 4—27329
sequence acceleration, lower bounds and fast algorithms 4—33727
shading analysis for solar engineering, appls. of generalised form of parametric equations for planar second order curves 4—40900
shell, thin stiffened, resonance response, nonlinear interactions 4—40598
simple turning points, Newton-like pseudo-arclength methods of computation 4—25373
single-bus multiprocessor architectures, efficiency anal. 4—29735
structural analysis of a large-scale system of equations by means of the M-decomposition of a graph *(Japanese)* 4—49501
nonlinear network analysis
CADLEM simulation program for nonlinear electronic networks 4—47010
computer-aided analysis and optimisation, using CACAO program *(German)* 4—27593
dynamic processes numerical anal. 4—40940
LALY, large-signal circuit analysis program for linear and nonlinear networks *(German)* 4—27619
multiple-nonlinearity systems exhibiting jump. reson. responses, freq. domain evaluation 4—24584
nearly-linear networks, anal., program module attachment *(German)* 4—27644
power electronic circuits, digital simulation and computer analysis 4—27680
nonlinear network synthesis
canonical nonlinear programming cct. 4—24234

MIMO systems, structure and parameter estimation using elementary subsystem representation 4—33063
missile control, reinitializing tracker 4—33531
model reference adaptive controller, simple output error based, explication 4—38018
moving average systems identification, square root normalized feedback ladder algorithm appl. 4—42242
multi-input multi-output systems, transfer function matrix identification via shifted Legendre polynomials 4—28746
multidimensional dynamic process, coefficient estimation for difference eqns. *(Russian)* 4—24246
multiple ARMA model for spectral density estimation *(Japanese)* 4—32576
multiple sinusoid signals, complete characterisation 4—48340
multistep systems under conditions of indeterminacy, adaptive estimation of evolution 4—37460
multivariable adaptive IIR filtering 4—37613
multivariable linear systems, uniquely identifiable state space and ARMA parameterisations 4—32536
multivariable regulators, structurally constrained, computer-aided design using parameter optimisation approach 4—48591
multivariable systems, discrete-time, linear, pseudocanonical forms, identifiable parameterisations and simple parameter estimation, input-output models 4—48585
multivariable time invariant systems, adaptive control 4—33076
multivariate estimation in simulation 4—32585
multivariate linear systems, consistent estimation of characteristic coefficient and poles 4—37975
multivariate nonlinear least squares estimates, probability distribution 4—42013
nonlinear data fusion 4—37534
nonlinear estimation and control, appl. of projections 4—28824
nonlinear industrial processes, classical, smoothed and least squares parameter estimation 4—43547
nonlinear programming problem, estimation of admissible parameter variations *(Russian)* 4—32524
nonlinear robot servomechanisms, online computer control 4—42586
nonlinear system adaptive state observation anal., appl. 4—48647
nonlinear systems, least squares parameter estimation algorithms 4—37462
nonoscillating transients anal. using covariance method with many different orders 4—42236
nonstationary processes, spectral anal. 4—32778
observer based on stagnant system view, design method *(Japanese)* 4—32575
operational response-time formulas and their sensitivity to error 4—28322
optimum control of measuring system in filtration problems *(Russian)* 4—24577
overdetermined recursive instrumental variable method 4—32570
parameter optimisation, output feedback control law, role of interactive graphics 4—36516
parametric model nonlinear stochastic autoregression processes identification, expt. results *(Russian)* 4—24192
pass scheduling for plate rolling, online parameter estimation 4—49021
periodic interference rejection using coherent sampling and waveform estimation in adaptive digital filters 4—44286
PHARM—an interactive graphic program for individual and population pharmacokinetic parameter estimation 4—27407
phase spectrum method, generalised, for time delay estimation 4—42305
phosphoric ore processing plant, predictive algorithm design for operative control systems 4—49284
PID control parameters, auto-tuning method 4—36486
pipe-rolling plants, adaptive models in systems for control *(Russian)* 4—24900
point processes with partial observations, parameter estimation, filtering approach 4—41856
power shift transformation parameters appl. 4—24189
power spectrum estimation method via moment space bounds 4—32776
prediction and estimation connection 4—37649
prediction filter order, frequency estimation accuracy 4—48356
priority assignment in queueing systems, optimal adaptive control 4—28803
process fault detection based on modeling and estimation methods—a survey 4—48802
process identification methods, comparative review *(Spanish)* 4—28441
production control, synthesis of dynamic model *(Russian)* 4—32924
projection data, maximum likelihood estimation of object size and orientation 4—48243
quantised data, companding approx. for statistical divergence 4—42306
recursive partitioning estimation for static/dynamic filtering and smoothing theory 4—24410
risk analysis and sensitivity analysis: antithesis or synthesis? 4—24278
robotic manipular, RHINO XR-1, adaptive control of shoulder joint position 4—29439
robust image estimation in signal-dependent noise 4—48254
seismic data, pulse estimation and deconvolution, adaptive least-squares for parametric spectral estimation 4—44352
sensors, fault diagnosis using vector gradient method *(Japanese)* 4—48555
sequential least-squares filtering and prediction, covariance type algorithm 4—33099
sequential parameter estimation, mean number of observations 4—28436

parameter estimation continued
serial link manipulator geometric parameter errors, estimation method 4–38476
signal subspace anal. and spectral estimation algorithms improvement 4–42234
sine waves in white noise, explicit formulas for freq. estimation 4–48338
source parameters estimation by max. likelihood and nonlinear regression 4–42249
spacecraft attitude determ. by Kalman based filter, convergence props. improvement 4–38592
spark ignited engines, estimation of fuel/air ratio from cylinder pressure 4–38253
spark ignition engine model building 4–38250
spectral estimation, maximum entropy, conditional limit characts. 4–32777
spectrum estimation, information 4–32775
stationary Gaussian processes, bilateral prediction 4–37646
stationary random process, minimax estimate of mean 4–37348
statistical instruction of diagnostic systems 4–37524

parabolic systems with Dirichlet boundary conditions, Ritz-Galerkin approx. of time optimal boundary control problem 4–33134
parallel solution of partial differential equations *(German)* 4–33755
partial Sturm sequences strategy for determ. of eigenvalues of symmetric function 4–49511
porous mechanism, diphasic flow, nonlinear partial differential eqns. *(French)* 4–24722
power systems, statistical synthesis of physically based load models with applications to cold load pickup 4–43064
preconditioned iterative methods for solving generalised eigenvalue problem 4–29445
preconditioning by incomplete block cyclic reduction 4–38754
pseudolinear eqns. method for quasilinear elliptic boundary-value problems, local convergence 4–43908
quasilinear parabolic equation, uniqueness of coefficients determ. 4–37297
quasilinear partial differential systems, optimal control 4–33043
regularity for complexity 4–25387
rotating flexible structures dynamics anal. by ordinary and partial differential equations 4–38566
second-degree normalised implicit conjugate gradient methods for large sparse systems of linear eqns. 4–43907
second-order elliptic problems with Newton boundary condition, finite-element soln. 4–29479
semiconductor transport eqns., quasi-static behaviour soln. using new iterative method 4–31562
smoothing data on sphere with tensor product splines, algorithm and FORTRAN IV subroutine 4–33719
tanks and continuous plates, struct. anal. 4–41101
three-dimensional grid generation using elliptic equations with direct grid distribution control 4–36028
unstable heat eqn., feedback stabilisation using auxiliary functional observer 4–33027
variational-iterative scheme applied to Burgers' equation 4–41902
vectorized multigrid Poisson solver for the CDC CYBER 205 4–25378

partial discharges
insulation, computer aided analysis of partial discharges in dielectric cavities 4–46903
power cable insulation breakdown, computer-aided system for partial discharge location *(Japanese)* 4–27543

particle accelerator accessories
see also storage rings
multichannel automated system for mag. field nonuniformity index meas. of synchrophasotron 4–27359

particle accelerators
see also beam handling equipment; cyclotrons; electron accelerators; electrostatic accelerators; linear accelerators; proton accelerators; synchrotrons
No entries

particle counters *see counters*

particle detectors
see also ionisation chambers; particle track visualisation; position sensitive particle detectors
computer aided measurement and analysis *(Hungarian)* 4–27345
control systems, memory intensive functional architecture 4–26252
flash ADCs for digital video, survey 4–25573
load characts. calc., w.r.t. time structure of pulsed particle sources 4–51504
MARK II detector, FASTBUS and data acquisition 4–26257
neutron time of flight meas., particle detector system 4–26253

particle focusing *see focusing; particle optics*

particle lenses, magnetic *see magnetic lenses*

particle optics
see also aberrations
No entries

particle size measurement
concentrator grinding circuit control using on-stream particle size monitor 4–24913
selective image analyser for use in particle metrology employing TV monitor and computer equipment *(German)* 4–43766
sinter plant charge agglomeration, automation *(Russian)* 4–49162

particle sources
see also ion sources; neutron sources; radioactive sources
pulsed, time structure modelling, particle detectors load characts. calc. 4–51504

particle spectrometers
see also beta-ray spectrometers; electron spectrometers; gamma-ray spectrometers; neutron spectrometers; X-ray spectrometers
MARK II detector, FASTBUS and data acquisition 4–26257
multilayer semiconductor spectrometer, automated electronic system 4–40611
PINK PANTHER CAMAC crate controller for π^0 spectrometers at CERN 4–36076

particle track visualisation
see also bubble chambers; nuclear track emulsions; scintillation chambers; spark chambers; streamer chambers
anomalon search using plastic track detectors and automatic measuring technique 4–43808
automated scanning systems for SSNTD and emulsions, current states 4–43792
CA8015 plastic detectors, pseudocolour techniques for nuclear track differentiation 4–43804
cellulose nitrate track detectors, α-track anal. using Interactive Image Analysis System 4–43793
conference on nuclear track registration, Richland, WA, USA (Jul. 1982) 4–31321
conference on solid state nuclear track detectors, Acapulco, Mexico (Sept. 1983) 4–43790
CR-39 detector, heavy nuclei tracks, automatic meas. system 4–43807
CR-39 nuclear track pseudocoloring by illumination wavefront angle variation 4–43798

particle track visualisation continued
- CR-39 proton and alpha etch pits, automated assessment techniques 4—43799
- CR-39 SSNTD, scanning by a sampling method, automated country 4—43801
- CR-39 track detector, automatic PEPR device for counting α-tracks 4—43794
- digital image processing for diameter distribution evaluation of nuclear tracks 4—43800
- DIGITRACK, CCD based system for automatic nuclear track counting and eval. 4—43802
- large area plastic nuclear track detectors, automatic track analysis 4—43806
- LR-115 detectors, automatic track counting 4—43795
- microprocessor based nuclear track measuring system 4—43805
- nuclear track profile determination by direct digital processing of SEM images 4—43803
- plastic SSNTD, opto-electronic system for automatic track counting 4—43796
- solid state track recorders, automatic scanning by computer controlled microscope 4—31322
- solid state track recorders, automatic scanning by computer controlled microscope, calibration 4—31323
- solid state track recorders, track counting, automated scanning electron microscopy 4—31324
- SSNTD semiautomatic track counting, use of commercial bacterial colony counter 4—43797

particle velocity analysis
- *see also mass spectrometers; particle spectrometers*

LUCh-77 program system, random direct methods, use of tangent formula 4−51524
magnetic field analysis, computer graphics using finite element method 4−27350
matrix multiplier/accumulator for lattice gauge theory Monte Carlo calc. 4−46691
MAXWEL program, Compton photon cross-section processor for relativistic electrons 4−51486
metals, ion implanted, oxidation, metal oxide thin films influence 4−36075
microcomputer aided data acquisition for nuclear physics experiments, using CAMAC system *(German)* 4−46722
microcomputer DC discharge intensity stabilization 4−51527
microcomputer simulation of multistage absorption columns 4−40622
microscope image processing in general purpose microcomputer 4−51509
modal equations, linear structural dynamics 4−41088
molecular models, electrostatic pot., evaluation by conventional, vector and array processors 4−31338
molecular physics, computers and computation 4−27385
molecules, electron density, electrostatic field characts., machine graphics methods 4−36074
multicomponent systems, mixing effects, subregular eqn. 4−40605
muonium in water, computer simulation 4−40616
NAJ5EF code for 4πγ detector total efficiency calcs. *(German)* 4−31328
narrowband dye laser with a large scan range 4−46661
NMR relaxation data, reduction program, in FORTRAN 4−36039
NODAPEC, online system for low temp. nuclear orientation expts. 4−44678
non-Newtonian flow, numerical simulation, book 4−51540
nonequilibrium axial flow model for the calculation of transient behaviour in two-phase flow 4−27383
nonlinear ordinary differential eqns., computer assisted solns. 4−46698

physics computing continued
nonrectangular inclined enclosure, convective fluid motion and heat transfer 4—31331
nuclear elastic scatt. program HERMES, cross-sections, tensor analysing powers 4—36038
nuclear heavy-ion reactions, charged-particle evaporation, GANES program simulation 4—27388
nuclear spectral data, resolution improvement using arithmetic operations 4—36053
NUZERO program, Hankel functions, determination of ν-zeros 4—51488
one dimensional transonic flow, numerical simulation employing microcomputer 4—40620
optical gas dynamics, Mattar-Newstein algorithm 4—46676
optical lens systems CAD intelligent program 4—51491
optical system, complex, automated construction using a computer 4—31346
optical system design *(German)* 4—31350
panel, stiffened cylindrical, nonmembrane prebuckling effects 4—41097
parallel processor (FPS-164), quantum chemistry codes 4—30027
particle detectors, computer aided measurement and analysis *(Hungarian)* 4—27345
particle detectors load characts. calc., w.r.t. time structure of pulsed particle sources 4—51504
particle separation by iterative methods *(Japanese)* 4—51534
pendulum, twin-elliptic, motion calc. program, Lissatubes 4—51489
photographic image quality optimisation using models 4—27365
physics education, interactive graphics package, appl. to collision phenomena 4—41194
Pi, computation, mathematical-educational aspects 4—46699
PINK PANTHER CAMAC crate controller for π^0 spectrometers at CERN 4—36076
plasma, conditional-probability function for elec. fields 4—46710
plasma time evolution of transport processes, computer codes for H isotopes 4—40617
plasmas, computer simulation techniques 4—46709
plate, circular, cylindrically orthotropic, post-buckling behaviour 4—40602
plate, circular, isotropic, thermal post-buckling 4—40601
plate, isotropic circular, nonlinear transient response 4—40597
polydomain crystals, TWIN program for refining at. structures 4—51525
polymer solutions, solvent activities and χ-parameters, UNIFAC programs calcs. 4—51503
polymers, thermal decomposition, thermogravimetric anal. using an automated system 4—36059
pressure loads, displacement dependent, nonlinear finite element anal. 4—40600
pressure vessels, steel, corrosion fatigue, development of engineering codes 4—46720
pressure vessels with extremal load, stress anal. of nozzles 4—46719
problem assignments using BASIC and word processor computer programs 4—27907
pulsed meson beam, 2D profile meas. by computerised tomography method 4—36049
QCD high p_T physics, Lund Monte Carlo method 4—36036
quark jet fragmentation, Monte Carlo code BAMJET 4—36040
radiation damage microstructure, microcomputer system for quantitative image analysis 4—51507
radioactive waste disposal, computerised system to calculate data to meet safety regulations 4—47300
radiographic inspection, pocket computer appl. to exposure parameters 4—31314
radionuclide laboratory, data acquisition system 4—36051
REGGEON program, hadron elastic scatt. amplitude in Reggeon field theory 4—51484
relativistic heavy ion streamer chamber expts., data acquisition of high multiplicity events 4—36050
research and development computer techniques *(Japanese)* 4—36272
rigid body system, 3D, dynamic simulation using vector-network techniques 4—51516
ROCKS crystallographic program system for macromolecular struct. determ., VAX adaptation 4—36058
ROCKS system of computer programs for macromolecular crystallography 4—36056
roundoff error in method of increments and representation of numbers implemented on problem-oriented special processor 4—51526
scanning electron microscopy for 3D meas., computer techniques for topographical anal. 4—31332
SEM-EDS computer controlled data collection and reduction system 4—36078
SEM-microcomputer system for quantitative morphological analysis, single object case 4—49435
SEM-microcomputer system for quantitative morphological analysis, complex images case 4—49436
serial section graphical reconstruction, GRIDSS programs 4—36064
sheared suspensions, dynamic simulation 4—36055
shell, circular cylindrical, fluid filled beam-type, fluid filled, bending vs. membrane theory 4—41092
shell, thin stiffened, resonance response, nonlinear interactions 4—40598
Small Angle Scattering Spectrometer, SAMPLE control program suite 4—29429
SNOW ion beam extraction simulation program, computers for design and testing 4—31352
soft magnetic materials, magnetisation and losses, microprocessor controlled system 4—33676
solid surface, Auger spectra data acquisition improvement *(French)* 4—31337
SOVPS program, virtual photon spectrum for M1, E1, E2 using Born approx. 4—51485
spark sources, high voltage, current waveforms simulation, rel. to gap dynamic impedance 4—36026
special-purpose computer designs for physics appls. 4—39172
specific heat of solids measurement, Robotron K 1510 microcomputer applications *(German)* 4—46723
SPECKLE-III code, fission reactor fuel, mixed carbide fuel performance modeling 4—51532
specular nonimaging baffled systems, use of real ray tracing to extend APART anal. 4—27351
Stanford linear accelerator, permanent CPU errors and system activity 4—30070
STEALTH verification for salt dome disposal of highly radioactive material 4—46731

physics computing continued
steel, duplex austenitic-ferritic stainless, weld solidification routes, thermal analysis, high speed data acquisition 4—36082
strange attractors, nonconvergence problem in computing the capacity *(Chinese)* 4—31313
stray light analysis with the HP-41C/CV calculator 4—27352
superparallel computers and computational physics *(Japanese)* 4—46717
supersonic flow, potential theory, finite difference numerical methods 4—46664
surface integration, 2-D numerical square mesh method 4—36033
symmetric groups, irreducible characters, Murnaghan's rule 4—36037
symmetry operation derivation from space-group symbols, SYMOP computer program 4—51539
TACO-2 code, fission reactor fuel rod performance 4—51533
TADS, thermal analysis data station, microcomputer for thermal anal. lab. 4—25831
teaching use 4—47401
thermophysics, exptl. data processing, hardware and software struct. 4—46701
three-centre nuclear attraction integrals for Slater type orbitals, computer-generated formulas 4—46708
three-dimensional flow field anal. using image processing techniques 4—46707
three-dimensional flow visualisation, computer graphics techniques 4—45558
three-dimensional grid generation using elliptic equations with direct grid distribution control 4—36028
three-point temperature recorder, converting a BBC Micro 4—51494
TRAN6 program for conduits and channels, transient free surface flow, numerical methods *(Chinese)* 4—51513
transmission electron microscopy, time shared television digital image processing system 4—51544
transonic potential flow, numerical computation 4—46728
transonic straight cascade, unsteady aerodynamic press. coefficients computation 4—46715
TRAQ I CAMAC System for multichannel data acquisition, storage and processing 4—26058
travelling salesman problem, optimization by simulated annealing 4—36080
tree storage and retrieval of multidimensional arrays, FORTRAN subroutines 4—36035
tree storage of multidimensional arrays, FORTRAN subroutines 4—36034
triatomic ro-vibrational state calcs. using ATOMDIAT2 and GENPOT codes 4—40596
TUBE code plasma MHD equilibria in 3-D, computation 4—31319
turbulent flow, higher level simulation 4—46727
UA1 at CERN, imaging drift chambers, multihit compact readout system 4—46692
unsteady transonic potential flow over three dimens. wings with oscill. control surfaces 4—46663
vacuum process, numerical method, use of elec. network analysis 4—51537
very large elliptic problems, soln. using supercomputer with Solid State Disk 4—46700
vibrations, large amplitude 4—40603
viscous-inviscid interactions computing in internal flows 4—46721
water clusters, neutral and protonated, struct. calc. with mol. graphics 4—46669
welding, computer appl., conf., Sydney, Australia, October 1983 4—33440
WIZJET, Monte Carlo program, simulation of $hh \rightarrow W^{\pm}(Z^0)$ in Weinberg model with QCD bremsstrahlung 4—46671
X-ray powder diffr. patterns, search/match anal. using compact databases 4—36057
X-ray powder diffraction meas., derivation of unit cell parameters using FIRESTAR programme 4—40595
$e^+e^- \rightarrow$jets, QCD Monte Carlo code PARJET 4—36041
Co-Fe-Mo-Ni, phase equilibr., Gibbs energy and activity coeff., SOLGASMIX program 4—40604
NaI(Tl) 3″Ø×3″ detector, response functions, data and method assessment 4—36054
Si, laser doping by dissociation of metal alkyls 4—36085

physiological models

gray scale images, data compaction, contour recovery from polygonal approx. 4−48222
high technology electronics exhibition and conference, Detroit, MI, USA, (June, 1983) 4−41363
high-speed scaling method of digital images utilizing periodicity of lattice coordinates *(Japanese)* 4−48218
histogram based cluster analysis procedure, analysis effects of sample size on classification performance 4−24346
histogram modification, visual perception 4−32634
homomorphic and local-statistics processing for restoration of images degraded by signal-depend. noise 4−24312
image coding, block classification using combined transforms 4−48226
image coding, optimal transform tree coding method 4−48227
image coding technique using transforms vector quantisation 4−48225
image contrast, complexity, and stability 4−42107
image data compression, quad-tree predictive coding algorithms 4−48221
image enhancement using the median and the interquartile distance 4−24323
image filtering algorithms, comparison 4−42133
image flow paradigm 4−42151
image mensuration techniques 4−28562
image motion estimation using integrated model and recursive algorithm 4−28505
image processing, adaptive, use of local image statistics 4−48238
image processing, two dimensional nonlinear median filters for reducing spiky noise 4−48228
image processing and understanding database *(Japanese)* 4−41010
image processing system for industrial robots 4−37570
image reconstruction from autocorrel. 4−42114
image reconstruction from freq. offset Fourier data, importance of random phase 4−42224
image restoration, adaptive, using one-dimensional approach 4−48234
image restoration, discrete-time discrete-frequency model using singular value decomposition 4−48237
image restoration, iterative generalised inverse soln. 4−48240
image restoration, iterative method for noisy blurred images 4−48233
image restoration, recursive Wiener filtering algorithm 4−48242
image restoration, two-dimensional adaptive image deblurring filter 4−48241
image restoration by generalised projections method, appl. to restoration from magnitude 4−48236
image restoration using Hunt's method, inverse filter effects 4−42111
image restoration wit signal-dependent noise, nonstationary 2-D recursive filter 4−48235
image segmentation, Gibbs distribution appl. 4−48232
image segmentation algorithm using overlapped pyramid, node anal. 4−48270
image segmentation using maximum entropy techniques 4−48231
image segmentation using spatial linear prediction 4−48230
image sequence processing, relationships between temporal and spatial dimensions 4−32626
image understanding research in the United States *(Japanese)* 4−37578
images degraded by light cloud cover, restoration using adaptive homomorphic filtering 4−48239
images insurance anal., robot vision 4−42144
interactive map processing, computer-aided 4−36817
interclass Mahalanobis distance, semi-invariants anal. 4−48176
interclass Mahalanobis distance moments 4−24332
invariant object recognition in frontoparallel plane 4−37586
knowledge-based cartographic feature extraction system architecture 4−37547
LMS image compression algorithm, bandwidth reduction and image distortion characts. 4−48246
local shading analysis 4−28513
M-times continuously differentiable piecewise-connected polynomials, interpolation theory 4−38722
manipulator with visual information, adaptive path control 4−38712
Markov-1 mode image recognition by least-squares linear mapping technique 4−24309
matched filter image detection, image correlation type and degree effects 4−44283
matching closed contours 4−42161
matrix quantizer for image processing 4−48244
maximum entropy image restorations 4−28583

picture processing continued
metal surface inspection using image processing techniques 4—37574
modulo masking for embedding data into pictures 4—24335
monochrome image encoding using Rademacher transform implementation 4—48212
monotone polygon triangulation using linear algorithm 4—28501
morphological binary image processing with a local neighborhood pipeline processor 4—42173
motion blurred images, identification of statistics and point spread function *(Japanese)* 4—42119
motion compensated image coding, coefficient energy concentration model 4—48248
motion determ. in image sequences, image features evaluation *(German)* 4—28525
motion estimation, 3D 4—48157
motion segmentation and estimation by constraint line clustering 4—42152
moving histograms for object location 4—49899
moving object recognition/classification, image sequence processing using FFT technique 4—24369
moving objects separation from picture background, multi-stage motion compensation use *(German)* 4—28530
multidimensional digital signal processing, filter design, spectral estimation and signal reconstruction 4—28632
multiple channel model for perception of optical flow 4—42155
multiple image frames, processing system for object recognition/classification 4—32637
multiple regression analysis approach to the automatic design of adaptive image processing systems 4—42092
multiresolution spline with application to image mosaics 4—32622
multispectral image classification for land use, computer method *(Japanese)* 4—32650
multispectral images, nonparametric classification method based on smooth test *(Japanese)* 4—32643
new likelihood test methods for change detection in image sequences 4—32633
noisy image processing using nonlinear digital filters 4—25677
nonlinear smoothing algorithm by using a combination of median filters *(Korean)* 4—38955
object correspondence problem using smoothness of motion 4—42156

electrical energy management in industry 4—38356
electricity network parameter influence on voltage variation statistical magnitude *(French)* 4—24786
emergency control during stability crises by tracing the observation decoupled reference 4—29093
emergency control improvement for power systems *(Russian)* 4—48892
emergency state control, identification of strong and weak areas 4—43060
emergency state power distribution, human decision making modelling 4—24847
Enel control system, design and realisation aspects *(Italian)* 4—43010
excitation controller, new design for multimachine power systems 4—33313
feed water pump motor, rotational speed control using thyristor cascade *(Polish)* 4—33219
four-machine power system, large fault, Arnold diffusion in the dynamics 4—38240
frequency deviation detection using two-state linear optimal estimator 4—38361
fusion plasma system thermal stability control 4—24783
hierarchical approach to dynamic optimization of power systems 4—29011
hierarchical controls in supply networks 4—38277
HVDC bipoles 1 and 2, Nelson River, paralleling and deparalleling tests 4—33307
HVDC links, AC faults, combined control and protection system 4—38311
independent power supply system control, improvement 4—24829
interconnected power system automatic generation control: decentralized area-wide optimal solution 4—29044
interconnected power systems, control systems linked through sinusoidal element, anal. 4—29083
large networks, software for automatic dispatcher control system 4—33283
load forecasting for power system control, self tuning prediction method *(Chinese)* 4—43050
load frequency control model for interconnected power systems, comparative study 4—38315
load frequency control of interconnected power systems using optimal variable-structure controller 4—24876
load regulation, type RBMK reactor generating station operation, Soviet Union *(Russian)* 4—33306

power system control continued
load-frequency controller, variable structure, design using pole assignment technique 4—48912
maintenance strategy choice regarding system availability for known MTBF of telecontrol equipments *(Croatian)* 4—24702
metallurgical industries power consumption optimisation, using TI 58/59 calculator *(Czech)* 4—36293
multi-area, load-frequency control with disturbance accommodation 4—48917
multilevel automatic control system for frequency and power overcurrents in the USSR Unified Electric Power System 4—24835
multimachine interconnected power systems, perturbation model, generalized 4—24854
multimachine power system emergency state control 4—48886
multimachine power systems, equivalent turbogenerator model for multivariable controller design 4—33317
multimachine power systems, stabiliser design calc. 4—43044
multimachine system, optimal stabilisation through matrix sign function theory 4—48956
multivariable controllers optimum use to improve performance 4—24845
new power consumption scheduling process for resistance welding equipment 4—25076
nuclear power district heating systems, plant, heat exchangers, economics and temperature control 4—24767
operative control of power consumption *(Russian)* 4—48890
operative statistical identification *(Russian)* 4—48889
optimal control problems with delays, preconditioned conjugate gradient methods, hydroelectric power systems scheduling appl. 4—38352
optimal DC power flow control of AC power systems with HVDC links 4—48943
optimal stabilization, computer modelling, matrix sign function theory 4—24853
optimum system configuration, max. effectiveness *(Croatian)* 4—24800
phase shifting transformers with leakage reactance, control 4—43154
photovoltaic power conditioners, maximum power point tracking problem, comparative study of solutions 4—43179
power engineering, midwest symposium, Iowa State University, USA (Oct. 1983) 4—48940
power supply transient protection for modern electronic equip., stabilisers 4—48906
